Price: **24.90 zł** gross / 20.24 zł net

Manufacturer: POPPY HEAD

Referention number: DNXGKQHNJRMNQ

Information:

An ultralight brightening and sculpting concealer that brightens the skin, optically smooths and helps shape facial features with light. It gives a fresh, natural finish without a mask-like effect or heavy layer. Ideal under the eyes, on the centre of the forehead, the bridge of the nose, the chin and under the cheekbones. It blends easily into the skin, allows the effect to be built up and does not weigh down the complexion. The built-in brush applicator enables precise, convenient application without extra accessories.

Full product description

Light instead of layers

Light, not layers. Brighten, lift, done!

The brightening and sculpting concealer with an ultra-light formula illuminates, visually smooths and helps shape the face with light. It does not weigh down the skin or create a heavy-layer effect.

Natural radiance

The concealer gives the skin a fresh look and highlights selected areas of the face. Its light consistency blends easily with the skin, leaving a natural finish without a mask-like effect.

Face sculpting

You can apply the product under the eyes, in the centre of the forehead, on the bridge of the nose, on the chin and under the cheekbones. Brightening these areas helps visually sculpt the features and add dimension to the face.

Ultra-light formula

The non-heavy formula allows you to build up the effect without creating a visible layer. The concealer visually smooths the skin and makes the face look fresher and more rested.

Brush applicator

The built-in brush applicator makes it easy to apply the product evenly without using additional accessories. It allows you to apply the concealer precisely to selected areas of the face.

How to use

Apply the concealer directly with the applicator to the areas you want to brighten or visually sculpt. Blend the product with your finger or a sponge. If needed, add another thin layer.
