Manufacturer: POPPY HEAD

Referention number: DNXGKQHOKRMMPN

Information:

Poppy Head Sheerum Glow Serum Primer is a brightening serum for under make-up that combines skincare with a primer effect. It optically smooths the skin, intensely hydrates it and gives the complexion a healthy, fresh glow. It contains Lactococcus Ferment Extract to support the microbiome and reduce moisture loss, soothing Centella Asiatica, and hyaluronic acid, N-acetylglucosamine and saccharide isomerate for long-lasting hydration. Niacinamide helps even out skin tone and brighten the complexion. The silky formula spreads easily, preparing the skin for make-up or delivering a subtle glow on its own.

Full product description

Glow and care

Poppy Head Sheerum Glow Serum Primer is a radiance-boosting serum primer that visually smooths the skin, moisturises it and gives it a healthy glow. The silky formula combines the effect of a base with caring properties.

Radiant complexion

The luminous finish makes the complexion look fresh and radiant. The serum can be applied under foundation to prepare the skin for make-up, or used on its own for a subtle glow effect.

Microbiome support

Lactococcus Ferment Extract supports the skin's natural microbiome and helps reduce moisture loss. Centella Asiatica soothes, strengthens the skin and helps maintain its elasticity.

Intensive hydration

Hyaluronic acid, N-acetylglucosamine and saccharide isomerate help bind moisture and maintain an appropriate level of hydration. As a result, the skin becomes soft, supple and visually smoothed.

Even skin tone

Niacinamide helps brighten the complexion and even out its tone. The silky texture makes it easier to spread cosmetics evenly and prepares the skin for the next stages of make-up.

Application method

Apply a thin layer of serum to cleansed skin and gently spread it. Use as a make-up base or on its own when you want a hydrated, fresh and radiant complexion.
