Information:

Poppy Head Skinivine Pressed Powder 02 Truly is a lightweight pressed powder that sets make-up and gives the complexion a naturally matte, soft finish without a heavy feel. The 02 Truly shade is almost transparent, so it adapts to the skin and does not alter the colour of foundation. The soft-focus blur formula visually smooths the complexion, reduces the appearance of pores and minor imperfections, and helps control shine. The powder also makes it easier to blend blush, bronzer and highlighter. It can be applied with a puff for a stronger effect or with a brush for a thin, natural layer. The compact packaging is ideal for touch-ups throughout the day.

Full product description

Poppy Head Skinivine

Poppy Head Skinivine Pressed Powder 02 Truly is a pressed powder that sets makeup and visually smooths the complexion. Its lightweight formula gives the skin a soft, naturally matte finish without a heavy layer effect.

Soft-focus blur effect

The powder visually reduces the appearance of pores and minor imperfections. It makes the complexion look smoother and more refined while retaining its natural character.

Natural, soft matte

The almost transparent shade 02 Truly adapts to the skin and does not alter the colour of the foundation. It helps set makeup, reduce visible shine and maintain a fresh finish.

Easy blending

The smooth formula ensures that blush, bronzer and highlighter blend seamlessly on powdered skin. It allows soft colour transitions without weighing down makeup.

Two application methods

A puff helps achieve a stronger smoothing and setting effect. Applying with a brush allows a thin layer of product to be applied while maintaining a light, natural finish.

Touch-ups during the day

The compact form means you can keep the powder close at hand and conveniently freshen up your makeup. A small amount of product helps reduce skin shine and restore a smooth, polished look to the complexion.
