Price: **29.90 zł** gross / 24.31 zł net

Manufacturer: POPPY HEAD

Referention number: DNXXGKQHPLRMNHK

**Information:**

Poppy Head Skinivine Pressed Powder 01 Barely is a lightweight pressed setting powder that smooths the complexion and gives it a soft, naturally matte finish. The soft-focus blur effect visually reduces the appearance of pores and minor imperfections, while the almost transparent shade does not alter the colour of foundation. The smooth formula makes it easier to apply further products, such as blush, bronzer and highlighter, without patchiness or a heavy effect. The powder can be applied with a puff for stronger smoothing or with a brush for a delicate layer, and the compact packaging is ideal for quick touch-ups during the day.

**Full product description**

**Poppy Head Skinivine**

Poppy Head Skinivine Pressed Powder 01 Barely is a pressed setting powder that visually smooths the complexion and gives it a soft, naturally matte finish. The lightweight formula helps keep makeup looking fresh without a heavy layer effect.

### **Soft-focus blur effect**

The powder diffuses light, making pores and minor imperfections appear less visible. The complexion looks smoother and more refined, while the soft matte finish preserves its natural character.

### **Transparent finish**

The almost transparent 01 Barely shade adapts to the skin and does not alter the colour of the foundation underneath. The powder helps set makeup while preserving its original shade and light finish.

## Easy layering

The smooth formula helps with seamless blending of subsequent makeup products. Blush, bronzer and highlighter spread easily over powdered skin, without creating visible patches or harsh colour transitions.

## Two application methods

Applying with a puff gives a more smoothing and setting effect. Using a brush allows you to apply a thin layer of powder and maintain a light, naturally matte finish.

### **Convenient makeup touch-ups**

The compact format means the powder can be kept close at hand and used for touch-ups throughout the day. Simply apply a small amount of product to selected areas of the face to reduce visible shine and restore a fresh, polished look to the complexion.
