Full product description

Velvet-matte effect

The soft lip pencil offers a comfortable, velvet-matte finish. It defines the contour and allows you to subtly shape the lips, while preserving the natural look of the colour.

Creamy formula

The formula glides smoothly over the lips, making even application easy. The colour can be blended and built up freely — from a delicate smoky effect to a more intense finish.

Subtle shaping

The pencil helps define, even out and optically shape the lip contour. You can use it to outline the lip line or apply the colour over the entire surface of the lips.

Built-in smudger

The smudger at the end of the pencil allows you to blend the contour and soften its lines. It helps achieve a subtle blurred effect without the need for additional accessories.

Naturally fuller lips

A properly defined and blended contour makes the lips look fuller, softer and naturally defined. The lightweight formula does not create a heavy effect.

How to use

Outline the lips with the pencil, then leave a defined contour or blend it with the smudger. You can apply the colour to the entire lips or gently pat it on. The product is available in six nude shades.
