Information:

POPPY HEAD Veilight Illuminating Powder 02 Sunlit Aura is a baked illuminating powder created for darker skin tones and enhancing a tan. The finely milled formula subtly reflects light, giving the complexion a warm, radiant glow and the effect of optically smoothed, fresh-looking skin. It spreads easily, allows you to build the intensity of the highlight, and provides a soft, natural finish. It is suitable for the face, décolletage and body, including the cheekbones, brow bone and Cupid's bow.

Full product description

Warm Radiance

POPPY HEAD Veilight Illuminating Powder 02 Sunlit Aura is a baked illuminating powder designed for darker skin tones and enhancing a tan. It gives the complexion a warm glow and helps achieve a fresh, optically smoothed-skin effect.

Luminous Finish

The finely milled formula subtly reflects light, making the skin look more radiant and rested. The intensity of the glow can be built up, tailoring the effect to daytime or evening make-up.

Baked Formula

The baked texture spreads easily on the skin and allows thin layers to be applied. The powder leaves a soft finish that does not overpower make-up and helps maintain a natural complexion.

Enhancing a Tan

The 02 Sunlit Aura shade is especially suitable for darker skin tones and tanned complexions. It can be applied selectively as a highlighter or over larger areas of the face to achieve a more luminous effect.

For Face and Body

You can apply the powder to the cheekbones, brow bone and Cupid's bow, as well as the décolletage and body. Highlighting selected areas helps enhance make-up and give the skin a cohesive, radiant look.

Application Method

Pick up the powder with a brush and apply it to the sides of the face, cheekbones, brow bone or décolletage. For a subtle glow, apply a thin layer, and if you want a stronger highlight, gradually add more product.
