Information:

POPPY HEAD Veilight Illuminating Powder 01 Radiant Halo is a baked illuminating powder created with lighter skin tones in mind. The finely milled formula subtly reflects light, giving the skin a soft, radiant glow and the effect of fresh, optically smoothed complexion. The product spreads easily, allows you to build intensity from a delicate to a more pronounced highlight, and provides a natural, smooth finish without weighing down the make-up. It is suitable for the face, décolleté and body, especially on the cheekbones, brow bone and Cupid's bow.

Full product description

Subtle radiance

POPPY HEAD Veilight Illuminating Powder 01 Radiant Halo is a baked illuminating powder designed for lighter complexions. It gives the skin a soft glow and helps achieve a fresh, optically smoothed complexion.

Radiant finish

The finely milled formula subtly reflects light, making the skin look more radiant and rested. The intensity of the glow can be built up to suit daytime or evening make-up.

Baked formula

The baked texture spreads easily on the skin and allows for thin layers to be applied. The product leaves a smooth finish that does not overpower make-up and helps maintain a natural-looking complexion.

Effect tailored to the complexion

Shade 01 Radiant Halo is especially suitable for lighter skin tones and for make-up worn in winter. It can be applied selectively as a highlighter or to larger areas of the face for a more luminous effect.

Not just for the face

You can apply the powder to the cheekbones, brow bone and Cupid's bow, as well as the décolletage and body. Highlighting selected areas helps enhance make-up and gives the skin a cohesive, radiant look.

How to apply

Pick up the powder with a brush and apply it to the sides of the face, cheekbones, brow bone or décolletage. For a subtle glow, apply a thin layer, and if you want a stronger highlight, build up the product gradually.
