Manufacturer: WANBO

Referention number: DNXGKQHRLRMNIQ

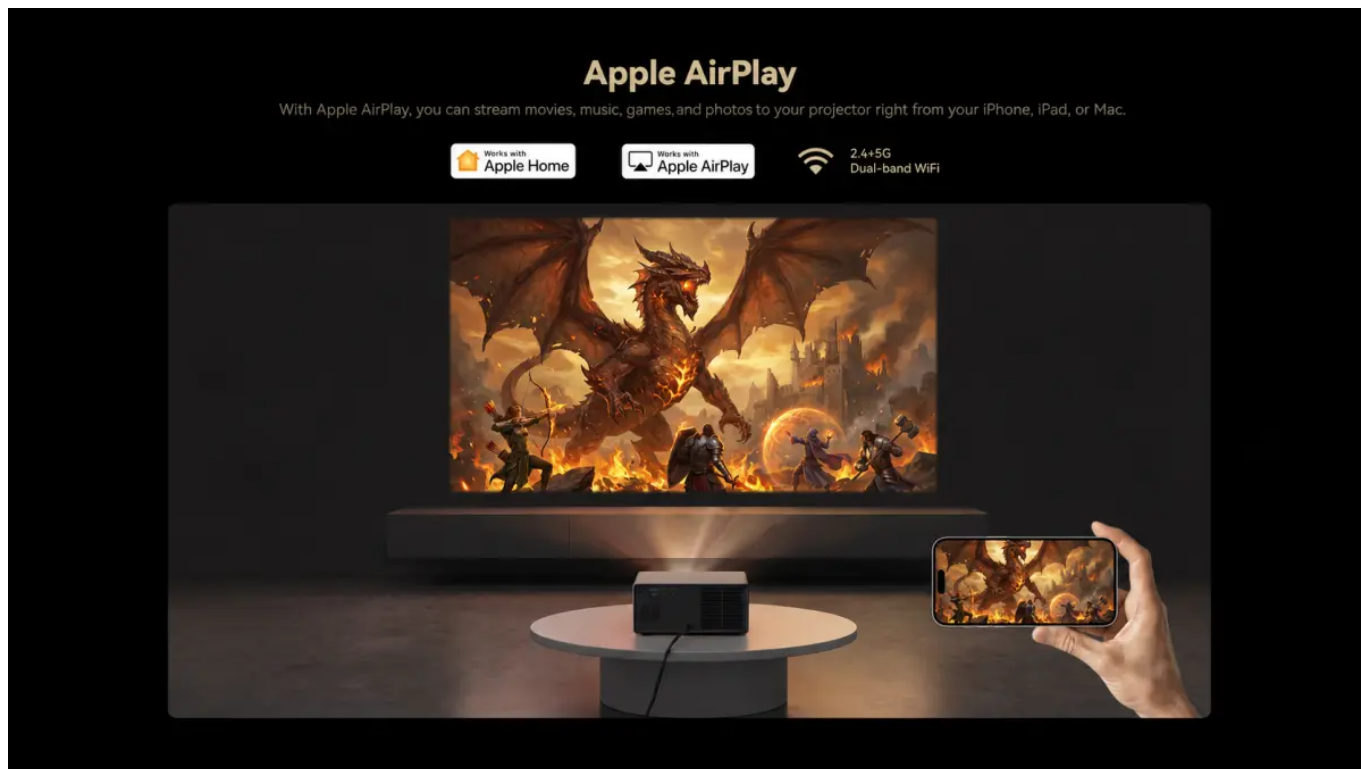

Information:

WANBO X5S is a Full HD 1920 × 1080 projector with 1100 ANSI lumens of brightness, ideal as a home entertainment hub. Thanks to VIDAA Smart TV OS, it works independently without the need to connect a computer, while Apple AirPlay support and dual-band Wi-Fi 2.4/5 GHz make wireless content sharing easy. ASA 3.0 automatic adjustment sets focus, image geometry and detects obstacles on its own, speeding up setup. Two 2 × 6 W speakers with Dolby Audio provide solid sound, and Bluetooth 5.0, HDMI and USB expand device connectivity. Quiet operation and an LED light source with a lifespan of over 20 000 hours complete the package.

Full product description

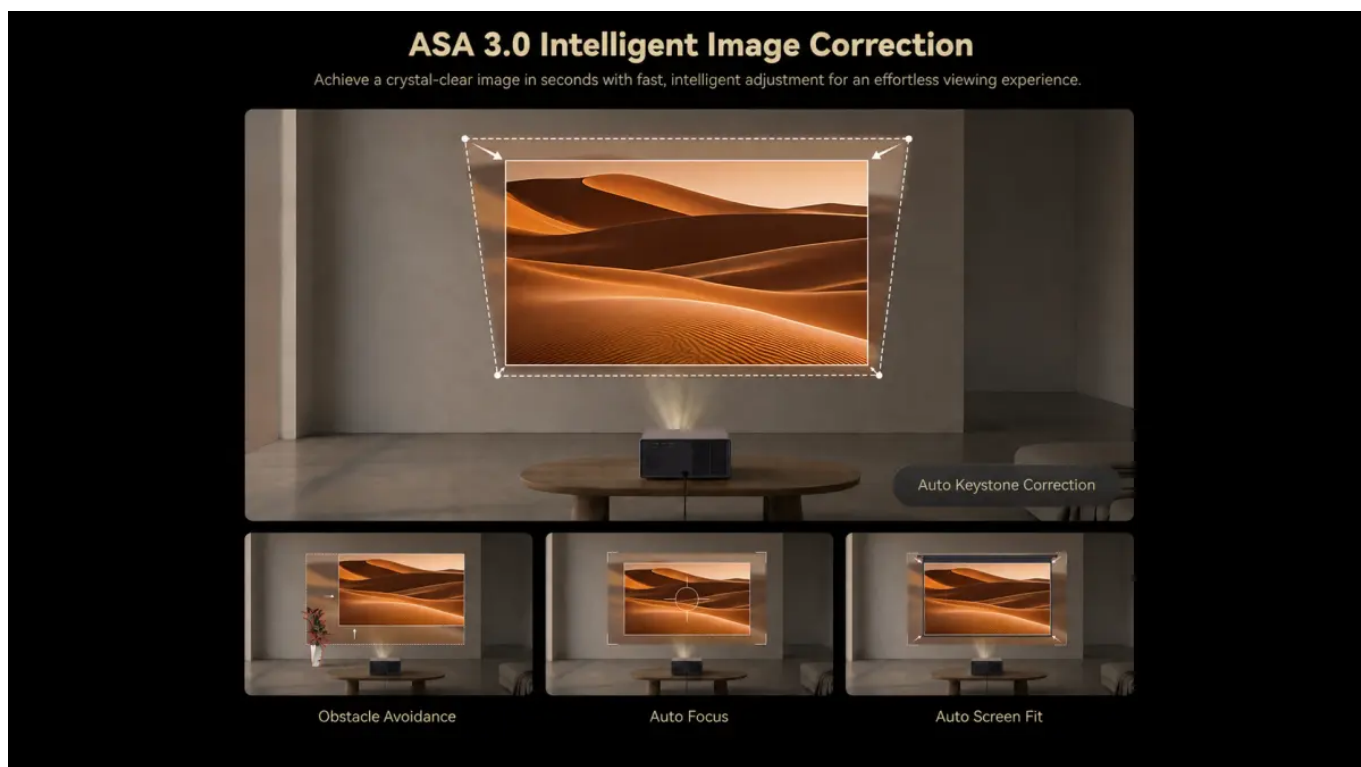

WANBO X5S with VIDAA Smart TV OS

WANBO X5S combines native Full HD resolution of 1920 × 1080 with 1100 ANSI lumens of brightness and the VIDAA Smart TV OS, creating a functional home entertainment hub. The projector can be used for watching films, series and multimedia content on a large screen, while Apple AirPlay support enables wireless sharing of compatible content from Apple devices. Dual-band Wi-Fi connectivity at 2.4 and 5 GHz makes it easy to use network features and stream media without the need for additional cables.

ASA 3.0 automatic adjustment

ASA 3.0 technology reduces the time needed to manually set up the projection after switching on the device or changing its position. The system includes automatic focus adjustment, image geometry correction, projection alignment to the screen surface and obstacle detection within the display area. As a result, the projector can independently correct the basic projection parameters, making it easier to use in a living room, bedroom or any other room where the device is often moved around.

Hi-Fi sound 2 × 6 W

The audio section is handled by two full-range speakers, each with 6 W of power, placed in a sealed acoustic chamber. The total output of 12 W means the projector can be used without having to connect an external audio system for everyday viewing of films, series or online content. Dolby Audio support enhances soundtrack playback and helps deliver a more spacious sound during screenings and other multimedia uses.

2*6W HiFi Speakers Immerse Yourself in Surround Music

Equipped with dual 6W sealed sound chamber and independent full band loudspeakers, to create a live sound effect.

Sound Chamber

Full HD and 1100 ANSI brightness

The projector displays images in a native resolution of 1920 × 1080 pixels, so Full HD content retains detail clarity when watching films as well as displaying photos or other content. A brightness level of 1100 ANSI lumens increases the device's usefulness in rooms where ambient light cannot always be fully reduced. The LED light source is designed for long-term use, and the manufacturer states a lifespan of over 20,000 hours for this design.

Light Up Every Scene

1100 ANSI brightness fills your room with vibrant colors, rich detail, and true-to-life visuals.

VIDAA Smart TV OS

The built-in VIDAA Smart TV OS means the WANBO X5S can function as a standalone multimedia device without the need to connect a computer each time. The interface is designed for remote control operation and allows convenient navigation between the available functions and content. This solution works well for everyday viewing, as the basic playback and multimedia functions remain available directly from the projector.

A Smart System Built for Projectors

Optimized for projectors, this smart system starts up quickly and runs smoothly, with a clean, intuitive, and family-friendly interface.

VIDAA

VIDAA VOICE

Bluetooth 5.0 and flexible audio

Bluetooth 5.0 connectivity expands the projector's possibilities in different scenarios. The user can connect compatible audio devices such as headphones or a wireless speaker, which is useful for evening viewing or when an external sound system is needed. The solution also makes it more convenient to use the projector during meetings and group screenings, without having to run audio cables across the room.

Two-Way Bluetooth: Dual-Mode Versatility

Pair Bluetooth headphones for private late-night viewing, or stream music via your phone to boost gatherings with immersive sound. Solo or social—effortless switching on one device.

Bluetooth 5.0

Quiet cooling system

The cooling system is responsible for dissipating heat generated during operation of the light source and the projector's components, while also reducing noise during viewing. The manufacturer states an operating level of up to around 26 dB/m, so the fan noise is less noticeable during dialogue and quieter scenes. The design of the ventilation channels helps maintain suitable operating conditions for the device during longer film screenings, gaming sessions or use of multimedia functions.

Quiet Cooling Immersive Viewing

Immerse yourself in your favorite shows and movies without noise, offering a comfortable viewing experience.

Connectivity with external devices

WANBO X5S allows the use of both wireless functions and wired devices. The connectors located on the rear of the housing make it possible to connect, among other things, image sources via HDMI, storage devices and compatible USB accessories, as well as external audio devices. As a result, the projector can be used not only as a standalone multimedia hub with VIDAA, but also as a display for a computer, console, player or other compatible signal sources.

HDMI 2.1: Expand Your Possibilities

Features an HDMI 2.1 port for 4K signal input, effortlessly connecting to game consoles, PCs, and beyond. Also includes dual USB ports and an AUX input for quick access to flash drives and external audio.

Specification

Parameter	Details
Model	WANBO X5S
System	VIDAA Smart TV OS
Native resolution	1920 × 1080 px, Full HD
