Information:

Xiaomi Mijia Vacuum Cleaner 4 EU is a cordless upright vacuum cleaner for everyday cleaning, combining high suction power of up to 230 AW and a motor speed of up to 120 000 rpm. It effectively removes dust and dirt from panels, tiles, carpets and hard-to-reach places. The illuminated brush makes cleaning in darker corners easier, while Auto mode automatically adjusts the power to the level of dirt. The replaceable battery provides up to 90 minutes of operation, and the multi-stage filtration traps up to 99.9% of fine dust. The Dual Anti-Tangle system reduces hair tangling, and the included accessories increase the device's versatility.

Full product description

Xiaomi Mijia Vacuum Cleaner 4 EU BHR09C4EU - cordless vacuum cleaner for everyday cleaning

Xiaomi Mijia Vacuum Cleaner 4 EU is a cordless upright vacuum cleaner that combines high suction power with a convenient design intended for everyday use. The device is equipped with a motor reaching speeds of up to 120,000 rpm and offers suction power of up to 230 AW. These parameters help effectively remove dust, crumbs and fine dirt from various surfaces around the home. The cordless design allows you to move freely between rooms without the limitations of a power cable.

Mijia Vacuum Cleaner 4

Product images may differ slightly from actual product.

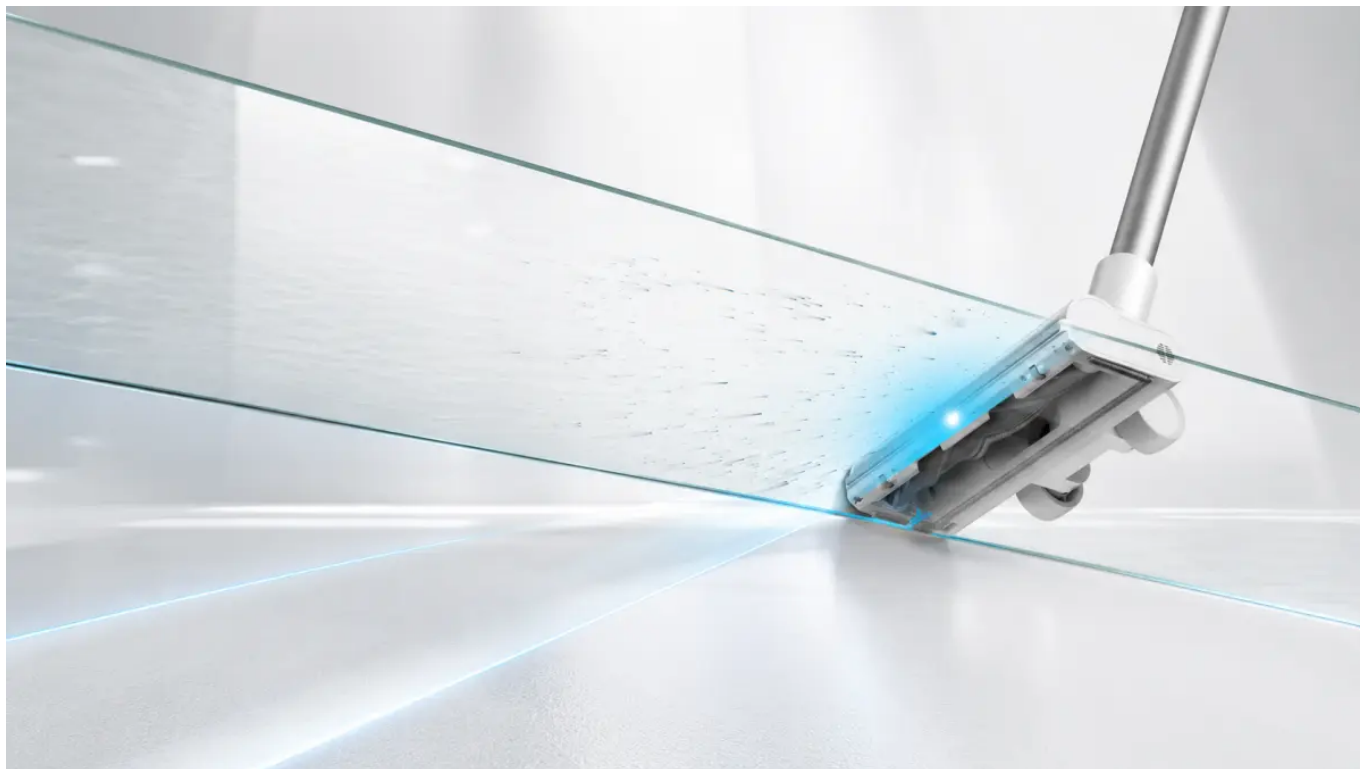

230 AW suction power and high-performance motor

Xiaomi Mijia Vacuum Cleaner 4 uses a high-speed motor that supports the efficient operation of the entire suction system. Suction power of up to 230 AW and negative pressure reaching 25,000 Pa help remove dirt found both on the floor surface and in hard-to-reach places. The vacuum cleaner is suitable for cleaning laminate flooring, tiles, carpets and other household surfaces. Thanks to its appropriately designed airflow structure, the device helps maintain stable performance during cleaning.

Illuminated brush for thorough cleaning

The main brush of the Xiaomi Mijia Vacuum Cleaner 4 is equipped with an illumination system that helps spot fine dirt while the device is in use. This feature is particularly useful when cleaning in dimly lit areas, such as spaces under furniture or along skirting boards. The specially designed head makes it easy to guide the vacuum cleaner across different surfaces. As a result, the user can more easily keep track of the area that has already been cleaned.

Automatic power adjustment during cleaning

The Auto mode in the Xiaomi Mijia Vacuum Cleaner 4 enables automatic adjustment of suction level to the current working conditions. The vacuum cleaner can adapt its performance depending on the amount of dirt detected, helping to use battery power efficiently. The user can also use Eco and Turbo modes, selecting the setting appropriate to the type of cleaning being carried out. This solution makes it easy to adapt the device's operation both to everyday freshening up of rooms and to more demanding tasks.

Long runtime thanks to a removable battery

The Xiaomi Mijia Vacuum Cleaner 4 is equipped with a removable battery that allows operation for up to 90 minutes under certain usage conditions. Such a long runtime makes it convenient to clean a larger area without frequently interrupting work to charge the device. Runtime depends on the selected mode and the attachment being used. The removable battery design makes it easier to manage power during regular use of the vacuum cleaner.

Fine dust filtration and a design that reduces hair tangling

Xiaomi Mijia Vacuum Cleaner 4 uses a multi-stage filtration system which, according to the manufacturer's data, helps trap up to 99.9% of fine dust. This solution supports cleaner air during cleaning by limiting the return of collected particles into the room. The brush has been designed with a Dual Anti-Tangle system that helps reduce the problem of hair accumulating around the working elements. As a result, maintenance of the device may be simpler during regular use.

Versatile accessories for different surfaces

The Xiaomi Mijia Vacuum Cleaner 4 comes with accessories that allow the device to be adapted to various tasks. The all-floor main brush enables floor cleaning, while the mini motorised brush helps clean smaller surfaces such as upholstered furniture. The 2-in-1 crevice tool is useful for removing dirt from hard-to-reach places. The included elements increase the device's functionality and allow it to be used in many areas of the home.

Convenient storage and quick access to the device

Thanks to the wall mount, the Xiaomi Mijia Vacuum Cleaner 4 can be stored neatly, saving space in the room. The vacuum cleaner remains ready to use whenever there is a need for quick cleaning. The lightweight cordless design and ergonomic layout of the controls help make the device comfortable to use during everyday household chores. Xiaomi Mijia Vacuum Cleaner 4 is a suitable solution for those looking for convenient equipment for regular cleaning.

Specification

Parameter	Details
Model	Xiaomi Mijia Vacuum Cleaner 4 EU
Model number	BHR09C4EU
