### Information:

Xiaomi Mijia Wireless Wet Dry Vacuum 5 Pro EU is a 3-in-1 cordless wet and dry vacuum cleaner that vacuums, washes floors and collects spilled liquids, ensuring convenient everyday cleaning. The 26 000 Pa suction power and steam cleaning up to 160°C help effectively remove dust, crumbs and stubborn, dried-on stains. The device offers 4 operating modes, a brush with an anti-tangle hair system and a flexible 180° design that makes cleaning under furniture easier. The 4000 mAh battery provides up to 40 minutes of operation, and the large clean and dirty water tanks increase ease of use. The base station automatically cleans the brush with hot water up to 100°C and dries the roller, reducing manual maintenance.

### Full product description

## Xiaomi Mijia Wireless Wet Dry Vacuum 5 Pro - comprehensive floor cleaning in one device

Xiaomi Mijia Wireless Wet Dry Vacuum 5 Pro EU is a cordless wet and dry vacuum cleaner that combines dry dirt removal, floor washing and the collection of spilled liquids. The device has been designed for everyday cleaning of various surfaces in the home, helping to remove dust, crumbs, stains and other dirt created during room use. A motor with a maximum suction power of 26,000 Pa enables effective suction of dirt, while several available operating modes allow the device to be adapted to current needs.

### **160°C steam cleaning to help remove stubborn dirt**

Xiaomi Mijia Wireless Wet Dry Vacuum 5 Pro uses steam cleaning technology with a temperature of up to 160°C, which helps dissolve dried stains and dirt on the floor surface. The combination of high steam temperature and 26,000 Pa suction power allows the surface to be cared for and dirt residues to be removed at the same time. The device offers four operating modes: Standard, Steam, Absorption and Power, so the user can choose the appropriate mode depending on the type of surface being cleaned or the level of dirt.

### **Brush with an anti-hair-tangling system**

During everyday cleaning, hair, pet fur and fibres from various materials can accumulate on the brush. Xiaomi Mijia Wireless Wet Dry Vacuum 5 Pro has been equipped with a roller with an anti-tangling mechanism, which uses special comb teeth to separate dirt from the brush. This solution helps reduce the need for frequent manual removal of tangled elements and makes it easier to keep the device in good condition during regular use.

### **Flexible 180° design and intelligent movement assistance**

The design of the Xiaomi Mijia Wireless Wet Dry Vacuum 5 Pro has been created with convenient handling in mind during everyday cleaning tasks. The ability to tilt the vacuum cleaner by 180° helps reach under low furniture and into places that often require extra effort when cleaning. Intelligent movement assistance in two directions makes it easier to move the device when pushing forwards, pulling back and turning, so cleaning larger areas is more efficient.

### **Long runtime and convenient water tanks**

The cordless design of the Xiaomi Mijia Wireless Wet Dry Vacuum 5 Pro allows you to move freely around rooms without the need for a power cable. The battery with a nominal capacity of 4000 mAh enables up to 40 minutes of operation in absorption mode. The device has a clean water tank with a capacity of about 1 litre and a dirty water tank holding about 700 ml, which helps make everyday cleaning convenient without frequent breaks for refilling or emptying the tanks.

### **Cleaning base with roller washing and drying function**

After cleaning, the Xiaomi Mijia Wireless Wet Dry Vacuum 5 Pro can be placed in the dedicated cleaning base. The station supports charging the device, automatic brush cleaning with hot water up to 100°C and the roller drying process. This means the device can be prepared for the next use without the need to manually clean the brush each time. The drying function operates at a noise level of around 45 dB(A), which helps reduce inconvenience after cleaning is finished.

### **Practical solutions for everyday home cleaning**

Xiaomi Mijia Wireless Wet Dry Vacuum 5 Pro EU comes with a set of accessories that allow you to start using it straight after unpacking. The package includes a handle, vacuum unit, cleaning base, cleaning brush and user manual. The manufacturer has also предусмотрел the option of using an optional foam cleaning agent set, which enables even application of foam during surface care. The combination of vacuuming, washing, steam cleaning and automatic maintenance makes the device a practical solution for regular floor care.
