Information:

Xiaomi Smart Band 11 Active is a lightweight and comfortable sports band for everyday activity and health monitoring. Equipped with a 1.47" colour display, it provides a clear view of the time, notifications and training data. It offers 24-hour heart rate monitoring, SpO₂, sleep and stress tracking, as well as breathing exercises. It supports over 50 sports modes, and 5 ATM water resistance increases its practicality for daily use. With a battery life of up to 14 days, a slim design and interchangeable straps, it combines functionality, comfort and style.

Full product description

Xiaomi Smart Band 11 Active - a lightweight sports band for every day

Xiaomi Smart Band 11 Active is a practical sports band created for people who want to conveniently track their activity, monitor selected health parameters and have quick access to the most important information without having to use a smartphone. The slim design and low weight of the device make the band comfortable throughout the whole day - at work, during rest, and while being physically active. Thanks to its universal look, the device suits different styles and can be used as an everyday accessory.

A 1.47-inch colour display for convenient operation

Xiaomi Smart Band 11 Active is equipped with a large 1.47-inch colour display with a resolution of 320 × 172 pixels, which makes it easy to check the information shown on the band. The clear interface allows you to quickly view the current time, training parameters, notifications and data related to daily activity. Touch operation makes navigating the menu intuitive and convenient, even while moving or exercising.

The large display area allows comfortable use of the many available watch faces, so you can match the look of the band to your own style. Xiaomi Smart Band 11 Active combines the functionality of a sports device with the aesthetics of an everyday accessory that looks good both during training and in business or leisure situations.

Health and everyday fitness monitoring

Xiaomi Smart Band 11 Active offers functions that help you better observe your body and daily habits. The band enables 24-hour heart rate monitoring, so the user can track changes in the body's activity in different situations. The device also lets you check blood oxygen saturation SpO₂ and analyse sleep, providing information that helps you better understand the quality of your rest.

In addition, the band supports stress level monitoring and breathing training functions. The collected data help the user track their own progress and consciously plan daily activity. All information can be analysed using the Xiaomi app, which allows you to conveniently view measurement history and activity results.

More than 50 sports modes for different workouts

Xiaomi Smart Band 11 Active has been designed with users leading an active lifestyle in mind. The band supports more than 50 sports modes, allowing you to tailor activity tracking to different disciplines and forms of exercise. Whether the user chooses running, fitness training, mat exercises, walking or other activities, the device makes it possible to monitor the most important data related to exertion.

During workouts, the band helps track the course of activity and maintain greater control over the goals being pursued. Thanks to its lightweight design and comfortable strap, it can accompany the user both during intense exercise and during calmer forms of movement performed every day.

Water-resistant design and wearing comfort

Xiaomi Smart Band 11 Active has been designed to meet the demands of everyday use. The casing provides 5 ATM water resistance, so the band can be used during daily activities involving contact with water. This allows you to use the device without worry in typical situations such as outdoor training or everyday use.

The device's low weight of around 16.5 g makes the band almost imperceptible on the wrist. The ergonomic shape and comfortable strap allow you to wear it comfortably for many hours, regardless of the type of activity being performed.

Long battery life without frequent charging

Xiaomi Smart Band 11 Active is equipped with a battery that allows long use without the need to frequently connect the device to a charger. With standard use, the band can last up to 14 days on a single charge, providing convenience during daily duties, travel and regular training sessions.

Long battery life lets you focus on activity and using the device's functions rather than remembering to charge it often. It is a practical solution for people who expect a reliable sports accessory that is always available when needed.

Style tailored to your life

Xiaomi Smart Band 11 Active combines a sporty character with a universal look, making it suitable for many situations. Different colour variants allow you to match the device to your own style, and interchangeable straps make it easy to change the band's appearance. It is a solution for people looking for a functional device to monitor activity, while also paying attention to the aesthetics of everyday accessories.

Thanks to the combination of sports functions, health monitoring, convenient operation and long battery life, Xiaomi Smart Band 11 Active is a versatile solution for users who want to actively control their everyday life.
