Information:

Xiaomi Watch S5 46 mm is an elegant smartwatch combining the classic look of a steel watch with modern functions. It offers a round 1.48" AMOLED display with a high brightness of 2500 nits, readable even in sunlight, and a comfortable, slim design. Thanks to the 815 mAh battery, it lasts up to 21 days on a single charge. The watch supports accurate activity tracking thanks to improved GNSS, offline maps and workout support, and also monitors heart rate, sleep and basic health parameters. Xiaomi HyperOS provides smart control of devices, gestures and calls, while 5 ATM water resistance and various strap options make it a practical choice for everyday use and sport.

Full product description

Xiaomi Watch S5 46 mm - smartwatch with AMOLED display and classic design

Xiaomi Watch S5 46 mm combines the look of a classic watch with the functions of a smart device for everyday use, sport and activity tracking. The 46 mm case is made of stainless steel, and the watch's round shape is inspired by traditional timepieces. The model is available in several colour variants with different strap types, so it can be matched to the user's individual style. The 10.99 mm-thick design and weight of approx. 45.6 g without the strap make the watch comfortable for long-term wear.

Steel case and 1.48-inch AMOLED display

Xiaomi Watch S5 46 mm is equipped with a round 1.48-inch AMOLED display with a resolution of 480 × 480 pixels. The display features a peak brightness of up to 2500 nits, making information easy to read even during outdoor activities. The display design has been optimised for a larger usable area – the screen-to-body ratio is up to 73.8%. The slim 2.6 mm bezel helps maintain an attractive appearance and convenient access to the most important information.

Long battery life and comfortable use

The Xiaomi Watch S5 46 mm smartwatch uses an 815 mAh battery, which provides up to 21 days of operation with typical use. In more demanding scenarios, battery life can be up to 14 days. This makes the watch ideal for everyday use, travel and regular training, reducing the need for frequent charging. The set includes a charging dock that makes it easy to top up the device's power.

Sport modes and more accurate route tracking

Xiaomi Watch S5 46 mm offers features designed with physically active users in mind. The improved GNSS system helps find the satellite signal faster and more accurately map the route taken during training. The watch also supports offline maps, allowing navigation during activities without a constant connection to a smartphone. The device also supports connection to an external cycling power meter and a phone workout data display mode.

Health and sleep monitoring

Xiaomi Watch S5 46 mm is equipped with a set of sensors that enable analysis of various parameters during everyday use. The optical heart rate measurement module uses a 4-LED 4PD PPG sensor, which supports more accurate activity monitoring. The watch also features an accelerometer, gyroscope, electronic compass, barometer and ambient light sensor. The improved sleep algorithm helps more accurately recognise the moments of falling asleep and waking up.

Xiaomi HyperOS and smart features

The watch runs on Xiaomi HyperOS, which enables efficient cooperation with compatible devices. Xiaomi Watch S5 46 mm allows control of selected functions of a smartphone, tablet, headphones and Xiaomi Home devices. It supports taking screenshots using two buttons, wearing mode on either wrist and gesture control, such as rejecting calls or taking photos remotely. These functions help make the device more convenient to use in different situations.

Connectivity and matching straps

Xiaomi Watch S5 46 mm supports Bluetooth 5.4 and 2.4 GHz Wi-Fi connectivity, enabling communication with a smartphone and other compatible devices. The model is available with different strap variants made of fluoro rubber, leather or a combination of fluoro rubber and nylon. This allows the user to choose a version suitable for both sports activities and everyday style.

Durability and readiness for everyday challenges

Xiaomi Watch S5 46 mm has a 5 ATM water resistance rating, making it suitable for everyday use and activities involving contact with water. The combination of a steel case, bright AMOLED display, extensive sports functions and health monitoring makes this smartwatch a versatile device for work, relaxation and training.

Specifications

Parameter	Details
Model	Xiaomi Watch S5 46 mm
