Information:

Stay Beauty C4 UV LED is a mains-powered nail styling lamp with 256 W, designed for curing hybrid polishes, gels, bases and top coats compatible with LED+UV technology. The combination of LED and UV light ensures broad compatibility and even curing of successive layers. The spacious interior and wide opening increase working comfort, while the panel on top of the housing makes operation and exposure time control easier. Its compact dimensions and low weight mean the lamp is ideal for use both at home and in a beauty salon.

Type	C4 UV LED

Full product description

Nail styling lamp

Stay Beauty C4 UV LED is a mains-powered lamp with a power of 256 W, designed for curing hybrid polishes, gels and other light-curing products compatible with LED+UV technology. The spacious interior allows you to position your hand comfortably while doing a manicure.

256 W power

The 256 W power supports efficient curing of successive layers of nail styling products. The arrangement of light sources inside the housing helps illuminate the nail plate evenly and makes it easier to do a manicure at home or in a beauty salon.

LED and UV technology

The combination of LED and UV light makes it possible to work with various light-curing products intended for this type of lamp. As a result, the device can be used when applying hybrid polishes, gels, bases and top coats compatible with LED+UV technology.

Convenient operation control

The panel located on the top of the housing makes it easy to operate the lamp and adjust the curing time to the product being used. Clear markings help control the curing process of individual styling layers.

Comfortable styling

The shape of the housing and the wide opening allow you to place your hand freely under the light sources. The design helps cure all nails comfortably during one cycle, streamlining the subsequent stages of the manicure.

Compact design

The housing, measuring 22.3 × 18.5 × 9 cm, does not take up much space at a nail styling station. Mains power allows you to use the lamp without needing to charge a battery, and its low weight makes it easy to carry and store.
