Information:

Stay Beauty UV LED is a lamp for curing hybrid polishes, gels and other light-cured products using LED+UV technology. The 280 W power supports fast and effective curing of successive manicure layers in accordance with the manufacturer's recommendations. The wide 40,5 cm design ensures comfortable use and easy hand insertion, while mains power allows long, uninterrupted operation without charging. The device is suitable for use both at home and in a beauty salon.

Full product description

Nail styling

Stay Beauty UV LED is a lamp designed for curing hybrid polishes, gels and other light-curing products compatible with LED+UV technology. The device is suitable for use during the successive stages of a manicure both at home and in a beauty salon.

280 W power

The 280 W power supports efficient curing of successive layers of the manicure. A properly selected exposure time helps achieve the correct curing of the base coat, polish, gel or top coat in accordance with the manufacturer's recommendations for the product used.

LED+UV technology

The combination of LED and UV technology allows the lamp to be used with various light-curing products designed for this type of device. This solution makes hybrid and gel manicures easier to perform without the need for separate lamps.

Working space

The 40.5 cm wide design offers the space needed to comfortably position the hand during curing. The housing helps shield the working area from the light sources, and the wide opening makes it easier to insert and remove the hand.

Mains power supply

The lamp is mains powered, so it can operate without the need to charge a battery. This solution is ideal for longer manicure sessions and allows the device to be used once connected to a suitable power source.

For home and salon

Stay Beauty UV LED can be part of a home manicure corner or a beauty salon station. The light-coloured housing fits the aesthetic of spaces intended for grooming, and the device's dimensions make it possible to prepare a comfortable working area.
