Information:

Stay Beauty X5 Max UV LED is a lamp for curing hybrid polishes, gels and other light-curing products in LED+UV technology. The 80 W power ensures efficient curing of successive layers of the style, and the option to select the exposure time allows the operation to be matched to the product used. The wide design makes it easy to position the hand comfortably, and the 230 V mains power supply guarantees convenient use without charging. The model is suitable for both home use and beauty salons.

Full product description

Hybrid manicure

Stay Beauty X5 Max UV LED is a lamp designed for curing hybrid polishes, gels and other light-curing products compatible with LED+UV technology. The device enables the successive stages of nail styling to be carried out in a home manicure corner or at a beauty station.

80 W power

The 80 W power supports efficient curing of individual styling layers. The exposure time can be adjusted according to the type of base coat, polish, gel or top coat, following the manufacturer's recommendations for the product used.

LED+UV technology

The combination of LED and UV technology makes it possible to work with various light-curing products intended for this type of lamp. As a result, the X5 Max model can be used when creating hybrid and gel nail styles.

Comfortable hand positioning

A width of 31.07 cm and a depth of 22.59 cm provide the space needed to position the hand comfortably during curing. The appropriately shaped housing helps shield the lamp's working area and makes it easier to carry out the next stages of the manicure.

Mains power supply

The X5 Max model is powered from the mains at 230 V, allowing it to be used without charging a battery. A constant connection to a power source is ideal when carrying out several styling stages and for regular use of the device.

For home and salon use

The Stay Beauty X5 Max lamp can be used both by people doing their own manicure and at beauty stations. Its housing makes it easy to prepare a comfortable space for curing styles, and the light colour scheme suits salon equipment or a home dressing table.
