Price: **219.00 zł** gross / 178.05 zł net

Manufacturer: AQARA

Referention number: DNXGLHKNJRMMLI

Information:

The Aqara Camera G100 Select 2-camera set provides 24/7 home monitoring in 2K quality, both indoors and outdoors. Each camera delivers a clear image day and night thanks to colour night mode and infrared, while intelligent AI detection reduces false alarms by detecting people and motion. IP65 resistance allows installation in various locations, and support for Wi-Fi 6 and WPA3 increases connection stability and security. The cameras work with Apple Home, HomeKit Secure Video, Google Home, Alexa, SmartThings and Home Assistant. Two-way audio is also available, along with flexible local recording to microSD, NAS or the HomeGuardian cloud.

Full product description

Home monitoring in 2K quality - set of 2 cameras

Discover the **set of 2 Aqara Camera G100 Select surveillance cameras**, a versatile solution for indoor and outdoor monitoring. Each camera offers **2K resolution image** and advanced night modes, allowing precise identification of events at any time of day. Intelligent **AI detection** and compatibility with ecosystems such as **Apple HomeKit** give you full control over your home security. **Two cameras in the set** allow simultaneous monitoring of two different places, e.g. the front door and the driveway.

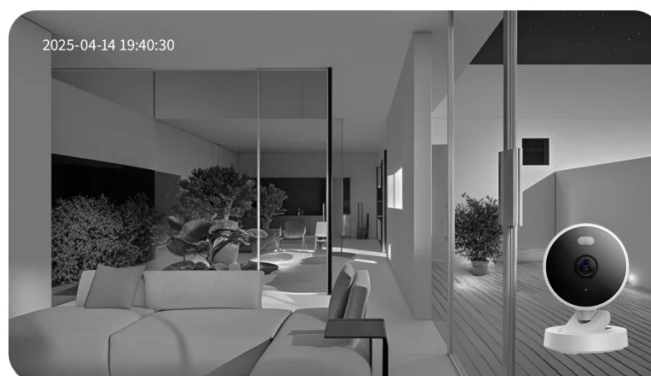

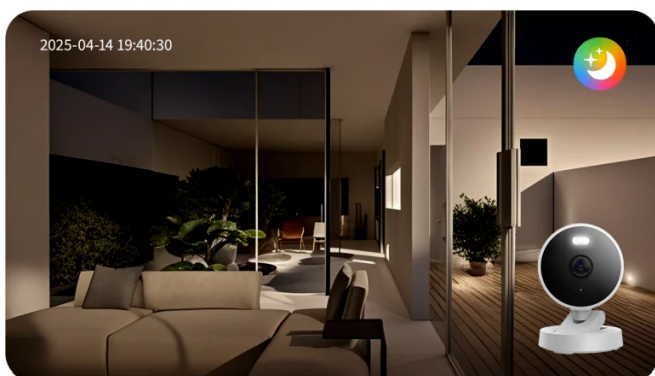

Key advantages of the Aqara G100 Select camera

- **Set of 2 cameras:** You can monitor two places at the same time and create a more comprehensive security system.
- **Detailed 24/7 monitoring:** 2K resolution and two night modes help deliver a clear image at any time.
- **Versatile mounting:** Weather resistance (IP65) allows the cameras to be installed in various locations.
- **Smart notifications:** AI detection distinguishes people from other moving objects, reducing the number of false alarms.
- **Full integration:** Compatibility with major smart home platforms enables you to create a coherent security system.
- **Privacy protection:** Local recording on a microSD card and NAS server gives you full control over your data.

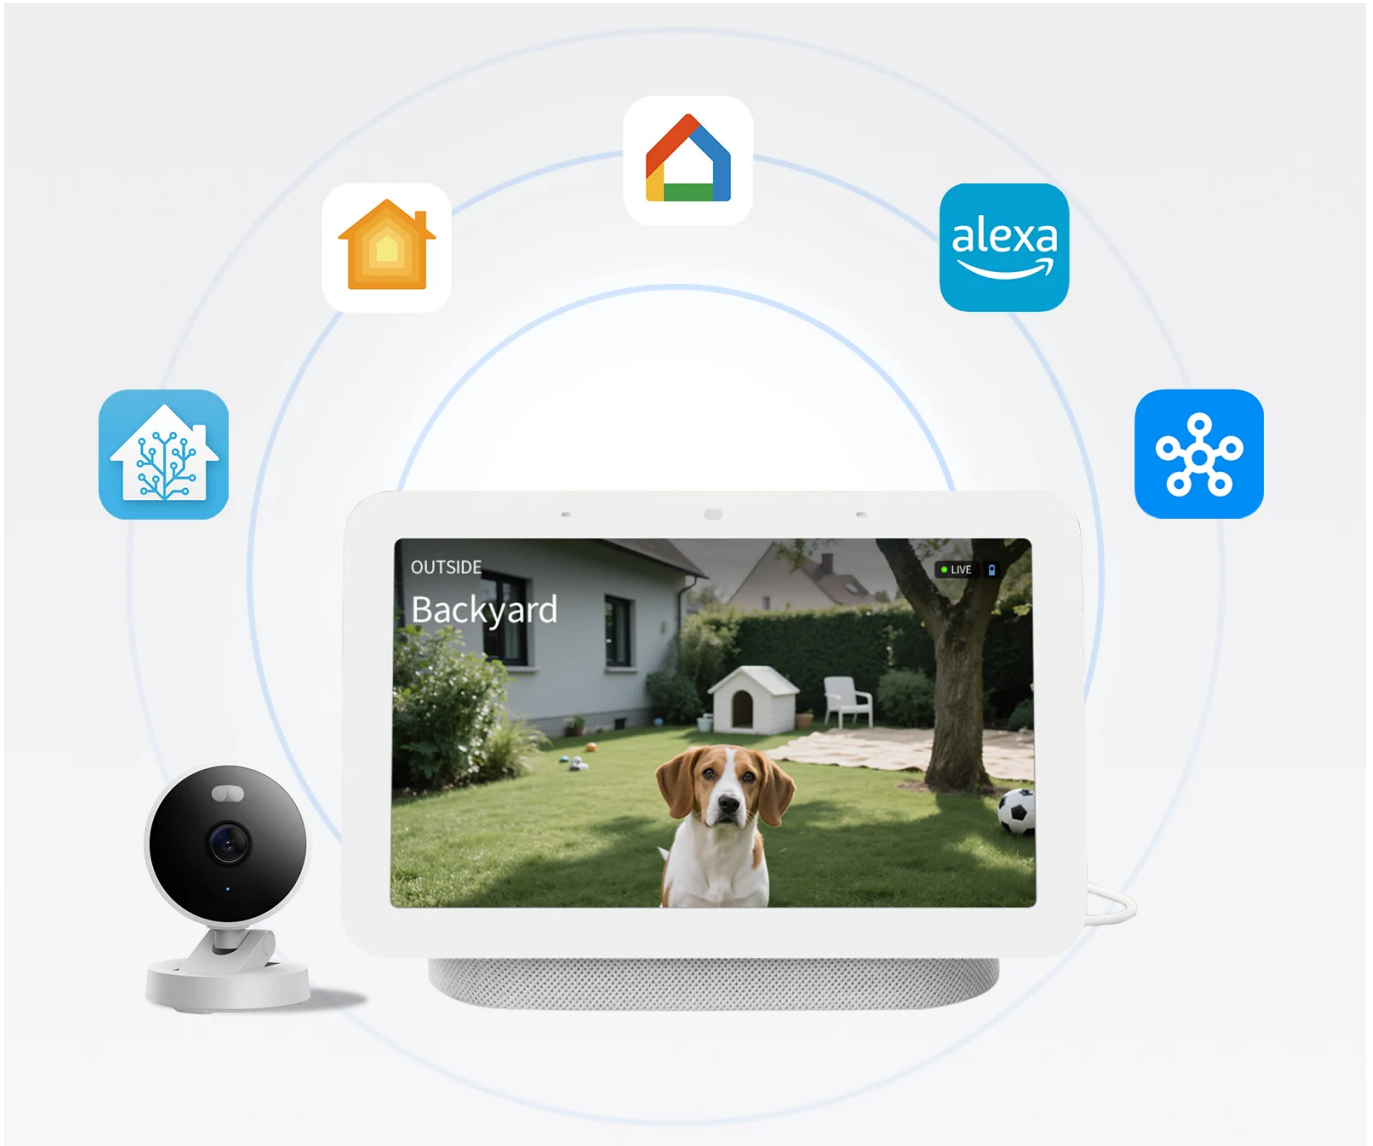

Clear image day and night

Each G100 camera offers **2K resolution and an f/1.8 aperture**, allowing every detail to be captured in high quality. **Dual night mode**, combining colour image and discreet infrared, ensures that no detail escapes your attention, even in complete darkness. The image remains clear and detailed around the clock, regardless of lighting conditions.

Wide compatibility

The device supports seamless Wi-Fi streaming to **Apple Home** (including HomeKit Secure Video), **Google Home**, **Alexa** and **SmartThings**. Integration with Home Assistant via RTSP stream opens the door to advanced automation. Built-in **two-way audio** enables real-time communication, making it easier to interact with guests or household members.

Use indoors and outdoors

The Aqara G100 camera with **IP65 water resistance** is designed to withstand a variety of weather conditions. This design allows it to be easily moved from indoors to outdoors, offering effective protection wherever you need it. **With 2 cameras in the set**, you can monitor both the living room and the driveway in front of the house, building a practical and flexible monitoring system.

Flexible recording options

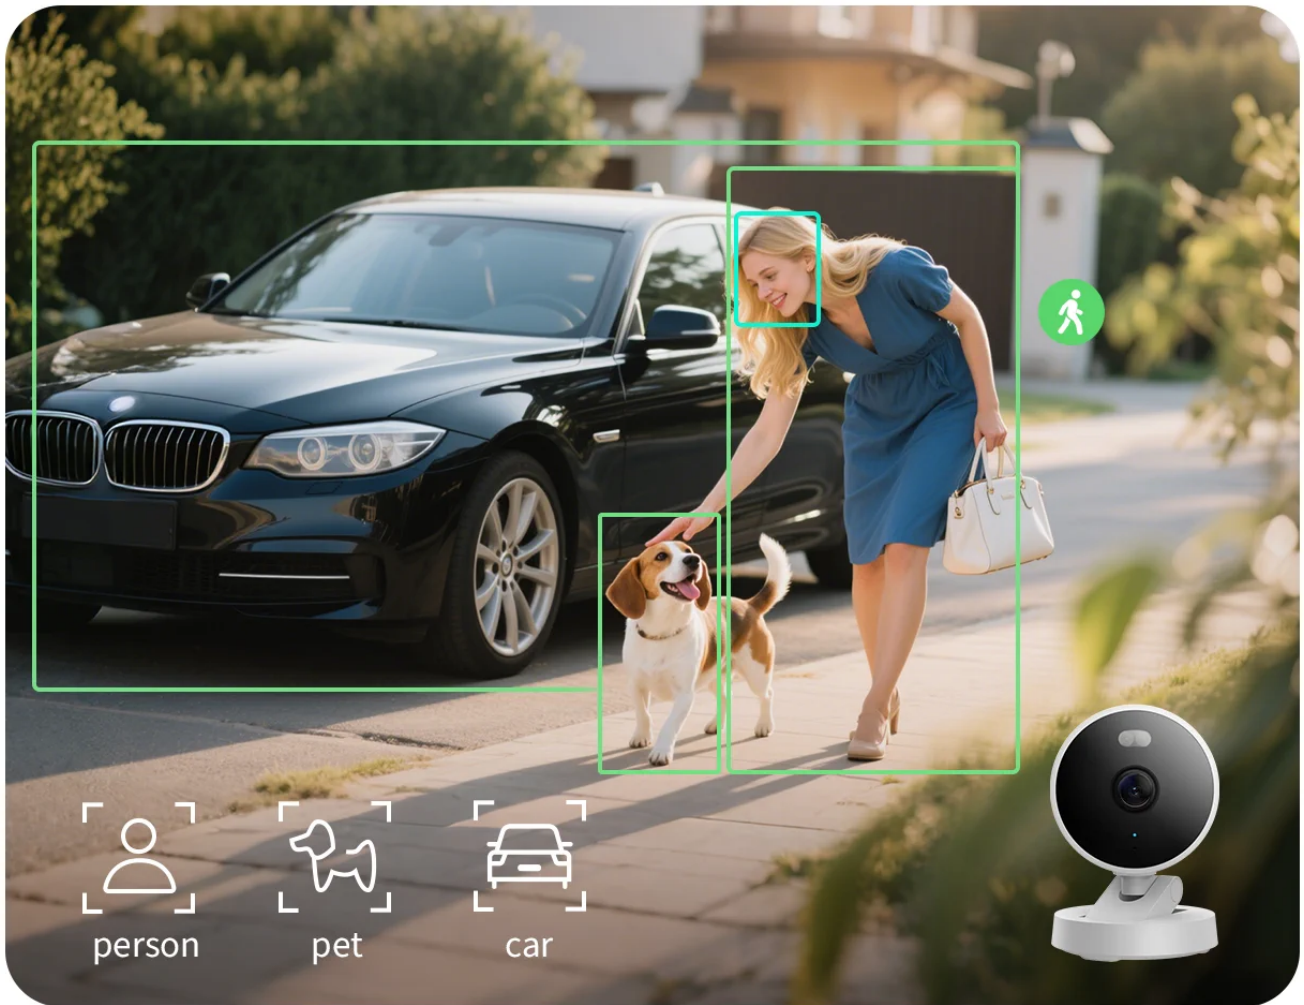

The Aqara G100 supports **local 24/7 recording** on microSD cards (up to 512 GB, **sold separately**) and backups on NAS servers. The optional HomeGuardian cloud solution offers end-to-end encryption and automatic tagging of key events, helping you easily find important moments on the timeline while protecting your data. **In the Select version, users receive a free 3-month trial**, which provides access to additional

recording space and advanced AI features. It is a great opportunity to fully explore the capabilities of this advanced device.

Intelligent AI detection

The camera is equipped with basic **local AI detection**, which helps ensure you receive notifications only when a person is detected (**motion and person detection**). For more demanding users, **advanced cloud detection** is available, capable of recognising faces, vehicles, animals and parcels (requires a HomeGuardian plan subscription).

Stable and secure Wi-Fi

The camera is equipped with support for **Wi-Fi 6 2.4 GHz**, which translates into wide coverage, better compatibility and resistance to interference. Support for the **WPA3** standard provides stronger protection for your network, minimising the risk of unauthorised access and protecting the privacy of your recordings.

The Aqara G100 surveillance camera is the ideal solution for:

- Homeowners and flat owners who want to monitor their property in more than one place.
- Users of smart home ecosystems such as Apple HomeKit or Google Home.
- People who need a flexible solution for indoor and outdoor use.
- Parents and pet carers who want insight into what is happening in and around the home.
- Anyone who values privacy thanks to local data storage options.
