Full product description

HALNy Networks

POLISH MANUFACTURER! That's how **HALNy Networks** company can be defined in short. Innovative devices for telecommunication solutions, which are mainly based on **subscriber terminals (Optical Network Terminal)**, but in portfolio you can also find **wireless routers**. **HALNy** is a professional solution for **ISP operators** to provide **multigigabit Internet**, television(**IPTV**) and **audio-video** services in very good quality.

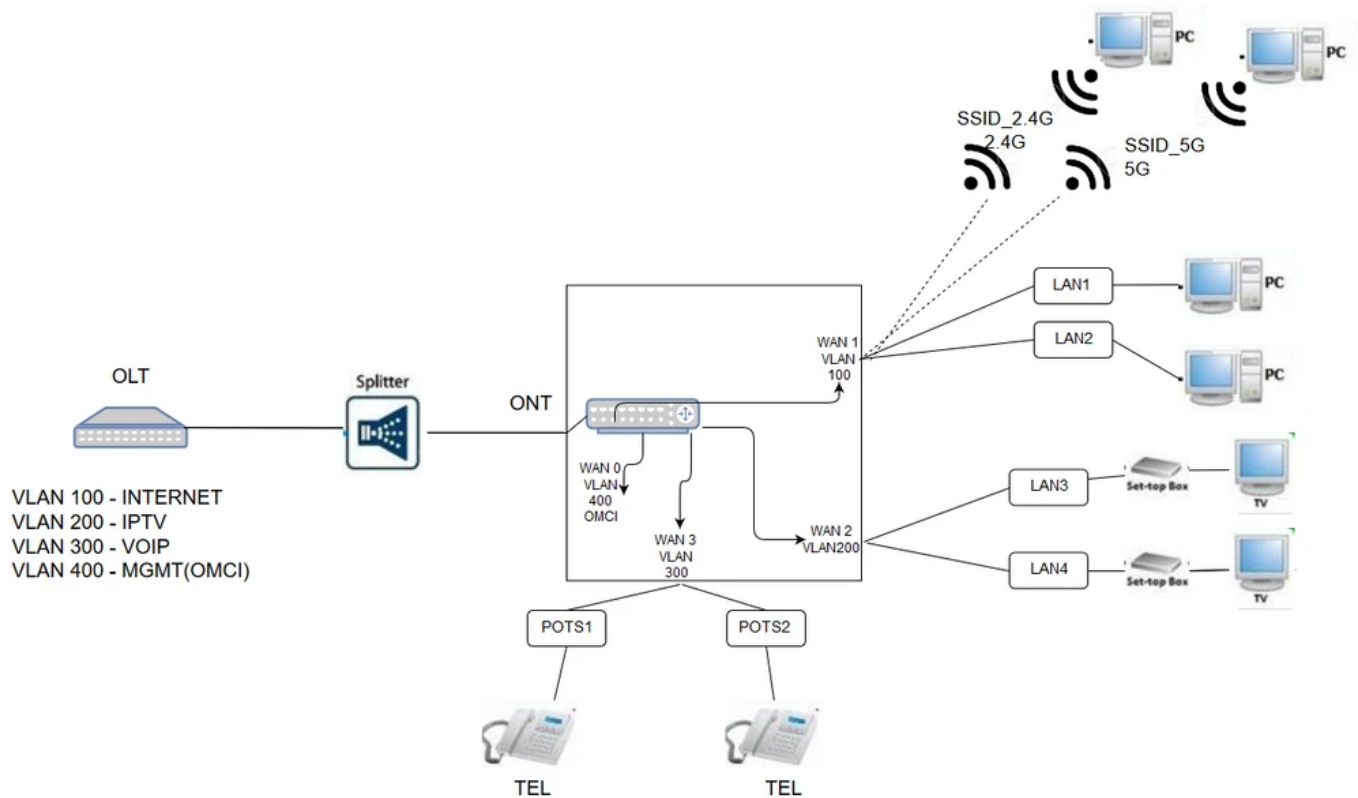

HALNy HL-4GMV4 GPON ONT

HALNy HL-4GMV4 GPON is a four port client terminal designed for installation in **FTTH (Fiber To The Home)** networks. It is based on **xPON** technology and complies with current **ITU-T** standards **G.984.x** and **G.988**.

HALNy triple play

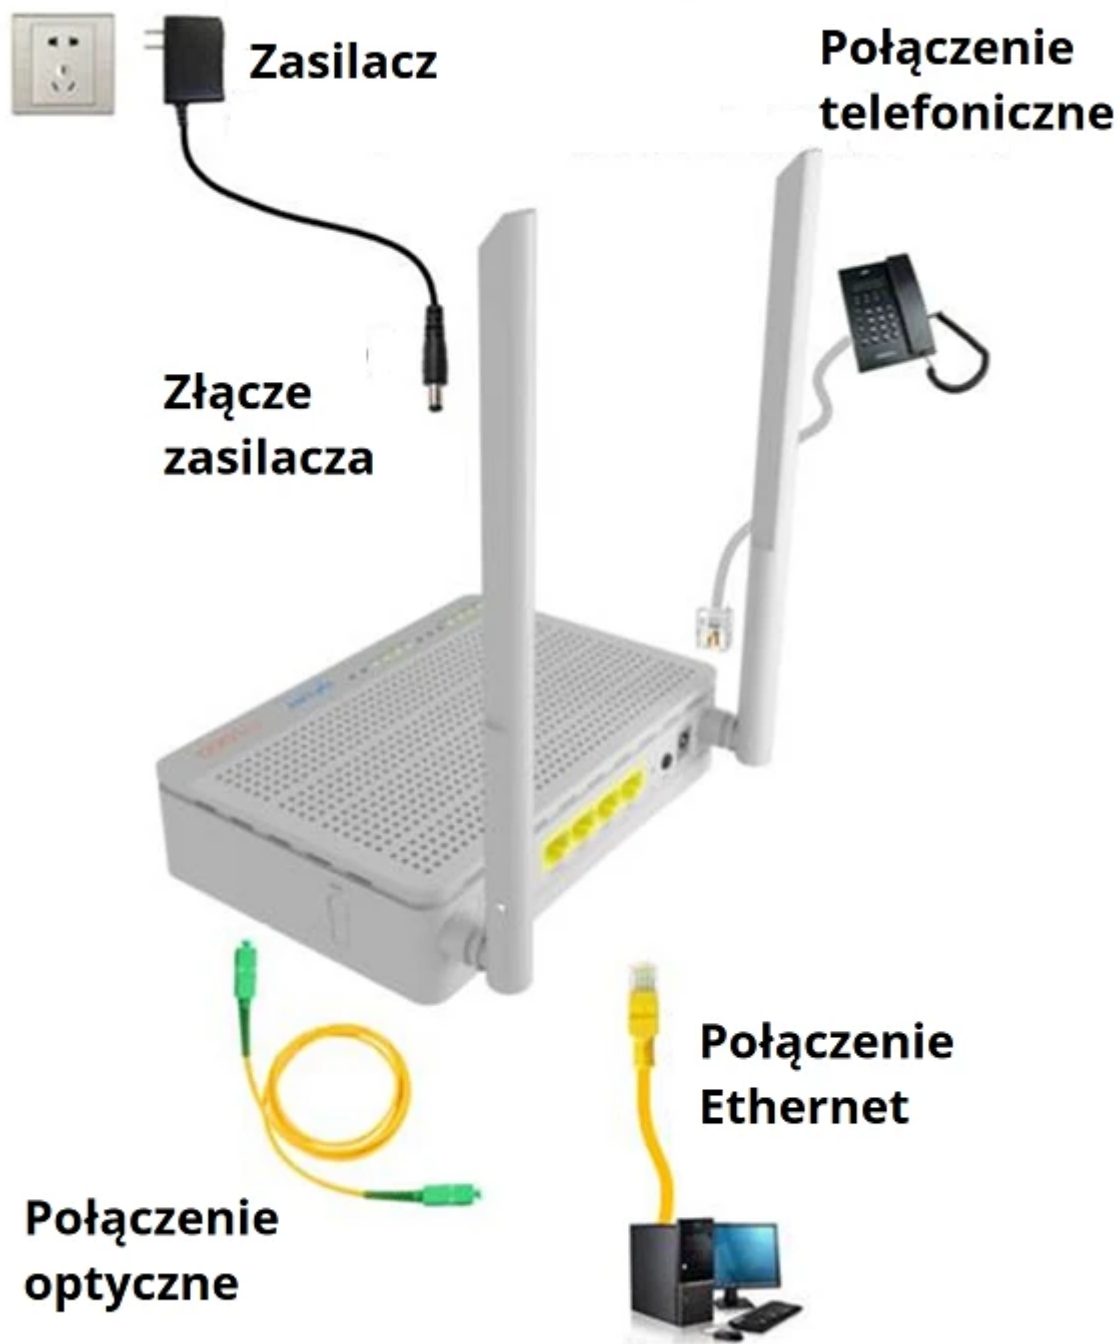

In addition to four Gigabit ports, the **HALNy HL-4GMV4** is equipped with **dual-band AC1200** (2.4GHz and 5GHz) wireless interface with **two external antennas**, each with 5dBi gain. The HL-4GMV supports MU-MIMO 2x2 technology. In addition, HALNy has equipped the ONT **xPON** with a **Voice FXS** port (**RJ-11**), so ISPs can provide full **triple play** service. Then the access to **high-speed Internet, IPTV and voice services** are realized on a single device.

All **HALNy** devices, by default, have all Layer2 functionality. ONT **HL-4GMV** also has advanced L2 **VLAN**, L2 **QoS**, Multicast **IGMP**, router(**HGU**) and **NAT** functions.

Compatibility with other operators

HALNy specializes in highly cost-effective projects and works closely with service providers. All of this is done to improve the profitability of operations with a wide range of standard products. It is extremely important that HALNy's **equipment is compatible with other companies**, making the solution very versatile.
