Hisense

Manufacturer: HISENSE

Referention number: DNKGGMHNGRMMGP

Product features

Package weight	8000 g
Power consumption (typical)	180 W
Power consumption (standby)	0.5 W
Package depth	359 mm
Package height	350 mm
Package width	391 mm
AC input frequency	50 Hz
AC input voltage	100 V
RMS rated power	20 W

Full product description

Strong, saturated colors

Experience the power of cinematography in all its glory, exploring the color palette like never before. The C1 Mini Laser Projector uses advanced three laser technology - red, green and blue - to deliver even higher color quality, achieving an impressive 110% of the color space according to the BT.2020 standard. As a result, the visual effects push the limits of your expectations.

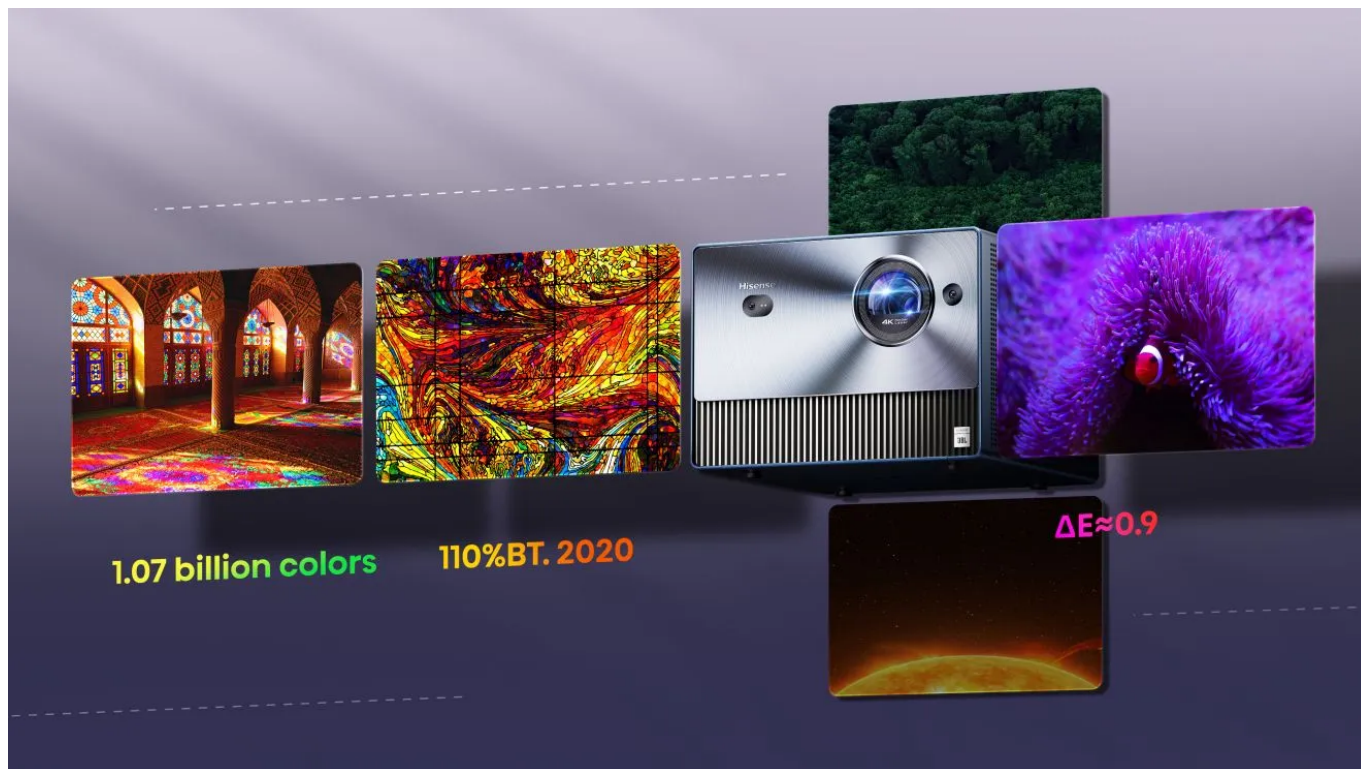

Image size from 65"to 300 inches

The Hisense C1 laser projector allows you to enjoy cinematic images from 65 to 300 inches, while providing impressive 4K UHD resolution. With a simple projection distance adjustment, simply adjust the projector's position relative to the wall and the image will be automatically scaled to the correct aspect ratio.

Hisense Auto Magic AI system

Hisense Auto Magic AI technology provides automatic and instantaneous image adjustment without the need for manual parameter configuration. The advanced system intelligently adjusts the geometry and sharpness of the image automatically. As a result, cinematic effects are available as soon as you take the projector out of the box.

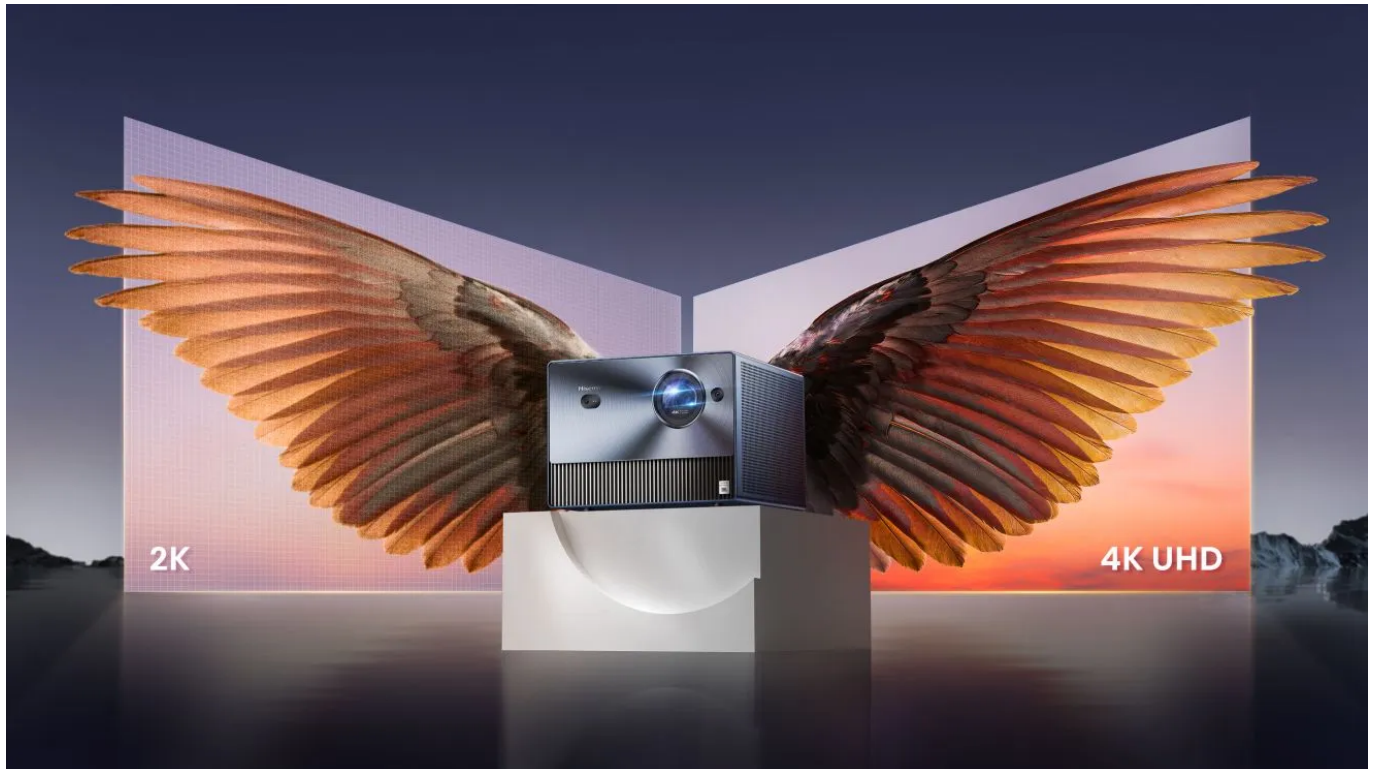

Bright, clear image

The C1 mini laser projector offers an impressive 1600 ANSI lumens of brightness, providing exceptional image quality even in a well-lit room. As a result, the Hisense C1 guarantees an experience similar to that of a real home theater, regardless of the time of day.

High resolution 4K UHD

The C1 laser projector is equipped with state-of-the-art Laser TriChroma technology and offers 4K UHD resolution. See for yourself what amazing dynamic images you can see on this miniature projector.

Mini projector with Dolby Vision

The Hisense C1 is a pioneering miniature projector that is the world's first to use Dolby Vision image technology, and also supports other standards such as HDR10 and HLG. As a result, the image presented by this projector is full of detail and intense colors, providing impressive contrast.
