Hisense

Manufacturer: HISENSE

Referention number: DNXGGMHNFRMLPQ

Product features

Package weight	12000 g
Power consumption (typical)	300 W
Power consumption (standby)	0.5 W
Package depth	435 mm
Package height	250 mm
Package width	610 mm
AC input voltage	120 V
RMS rated power	30 W

Full product description

Hisense Laser Cinema - with pioneering laser technology

The laser projector uses X-Fusion light technology, which translates into an exceptionally accurate and crisp image, natural color reproduction and a guarantee of at least 25,000 hours of continuous entertainment.

Ultra-short-throw technology

The Hisense Laser Cinema PL1SE projector, with its innovative ultra-short-throw technology, eliminates the need for complicated installation, such as wall or ceiling mounting, to provide a cinematic experience from close to the wall. Simply place the projector on a cabinet, just 42 cm from the wall, and you'll gain the ability to view a huge 120-inch image projected directly onto your wall (screen not included).

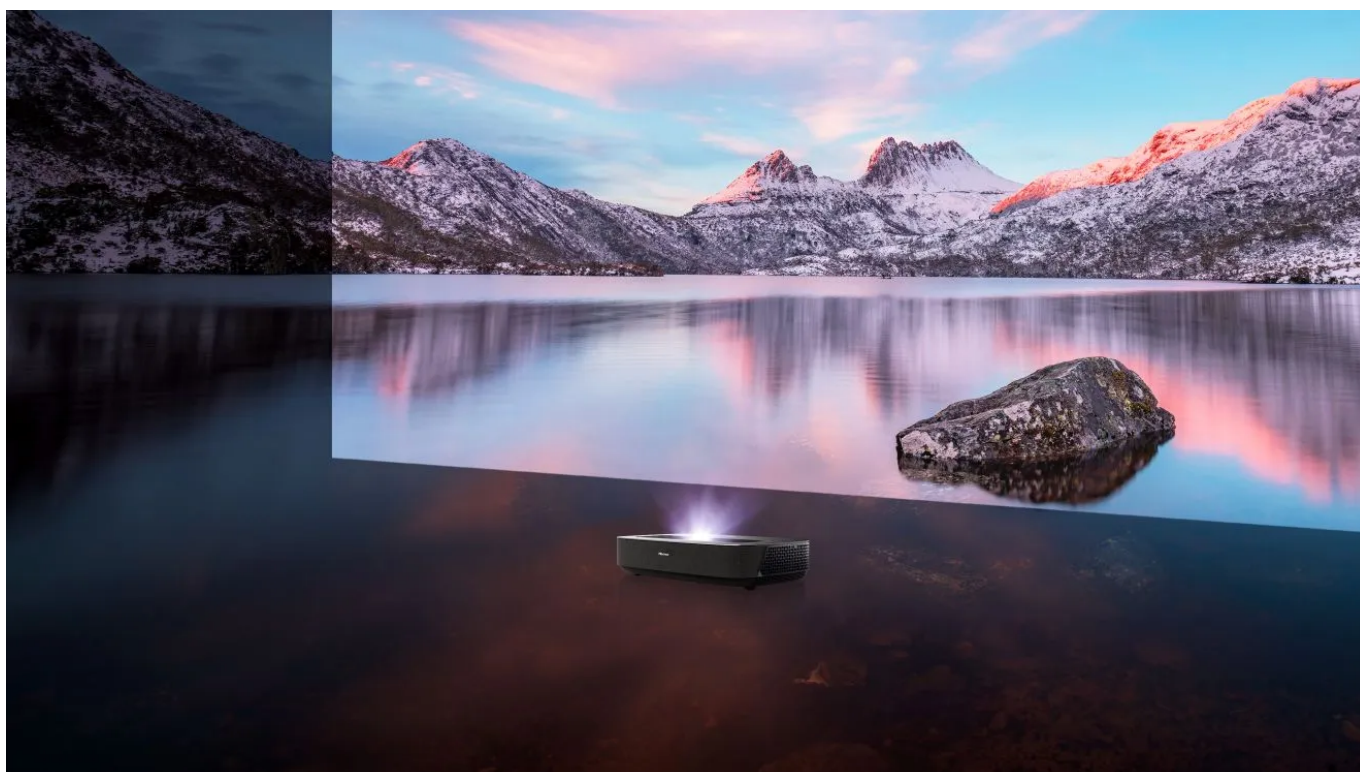

Customizable image size from 80 to a gigantic 120 inches

Thanks to its ultra-short throw technology, the Laser Cinema PL1SE projector will adapt perfectly to your interior, offering a dynamic image of any size you want. Simply adjust the distance from the wall accordingly to enjoy a screen size from 80 to a massive 120 inches.

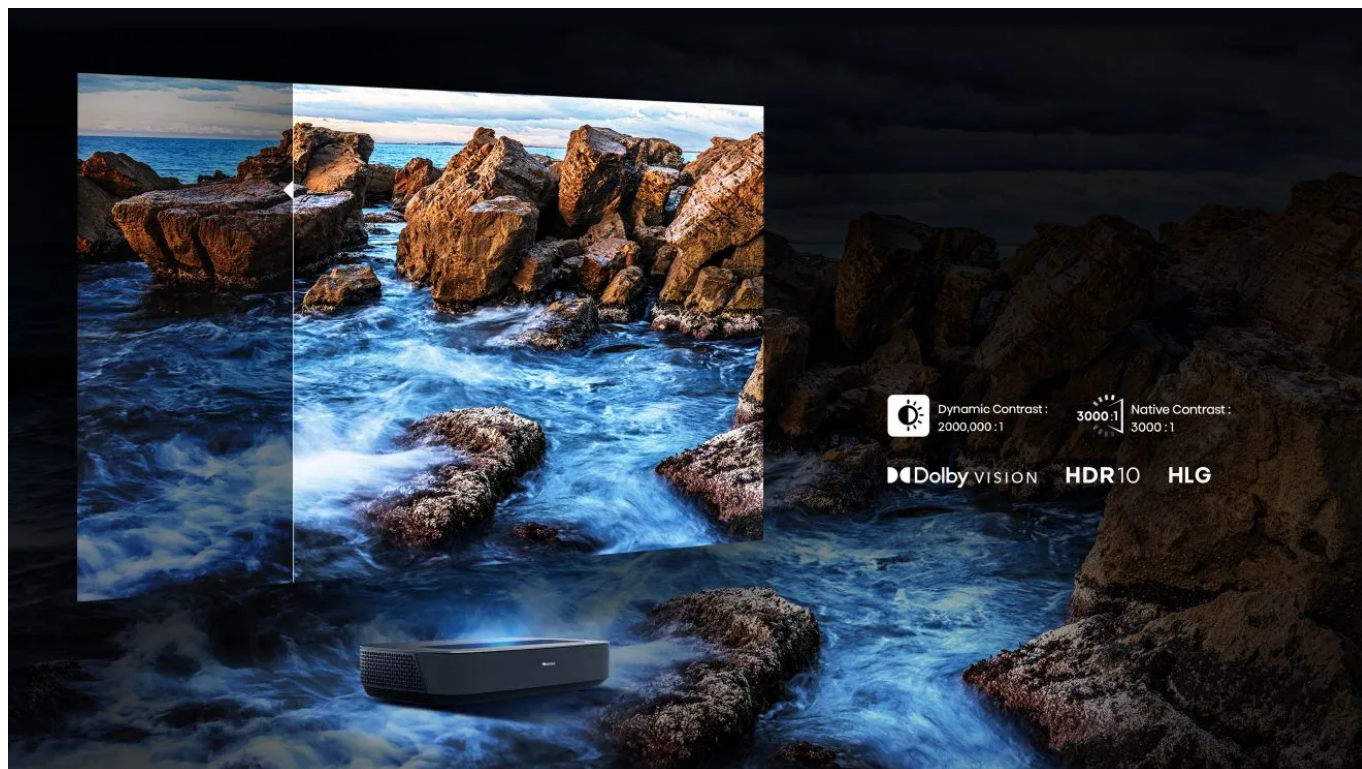

Bright and vivid image

Discover an amazing image full of rich colors, reaching a brightness of 2100 ANSI Lumens. The cinema-sized image looks exceptionally bright and clear.

Detailed image full of details

High Dynamic Range (HDR) is an innovative technology that expands the tonal range of an image, providing superior contrast and a more faithful reproduction of colors and their intensity. Thanks to it, the Hisense PL1SE laser projector presents images with exceptional realism, richer in detail and a deeper experience.

4K UHD for sharp and realistic images

The Hisense PL1SE laser projector provides a 4K resolution image, which means the viewer can enjoy up to 8 million pixels, creating an image that is sharp, rich in detail and color saturation. Experience the ultimate viewing experience for yourself.
