Full product description

Huawei ETP4830-A1 power supply with SMU01B module

Huawei ETP4830-A1 power supply is a telecommunication power supply, which is used to power electrical devices safely and continuously without any interruption should there be a mains power outage.

With the built-in AC/DC power system, **Huawei ETP4830-A1** achieves high energy efficiency, while the built-in **SMU01B** module guarantees a wide AC output voltage range and intelligent management. The telecommunication power supply unit is designed for installation in **19 rack** cabinets.

SMU01B module

The SMU01B embedded module from HUAWEI allows you to **manage and monitor your telecom power system**. The module is equipped with an LCD screen that enables human-machine interaction. The system is designed to meet high reliability requirements.
