Full product description

Huawei GPBD 8-port GPON interface card

Huawei GPBD is an **8-port** GPON OLT interface **card** that works with an optical network terminal (ONT) to provide GPON access service. GPBD can connect up to **1024 GPON subscriptions**. The card works with Huawei's OLT devices - MA5608, MA5683 and MA5680.

Main features of the H805GPBD

- eight **GPON SFP** ports
- maximum split ratio of 1:128
- class B and class C optical modules
- received signal strength index (RSSI) detection and controlled optical transmission of the optical module
- ONU-based shaping
- **optical performance monitor (OPM)**
- automatic power off in case of high temperature

Operating principle of the H805GPBD
