Full product description

Huawei brand 1.25GMCUD card for 5608T base station

The Huawei MCUD 1.25G expansion card is designed for **the 5608T base station**. It has 2 SFP slots (10 Gbps) and 2 SFP slots, a control module and an Ethernet port. **SFP / SFP inserts are not included** .

Huawei high-performance control and uplink board for OLT 5608T terminal

The easy-to-install **Huawei H80MCUD101** uplink control module **works with Huawei's OLT 5608T GPON**. The terminal allows the installation of **up to two boards of** this type, enabling load balancing in such a case.

Convenient interfaces for better control

The card is equipped with **two indicator lights, ACT and RUN/ALM**. In addition to **2 SFP slots and 2 SFP slots**, it also offers a **Fast Ethernet RJ-45 port** for remote management. The local **control module interface** consists of 4 RJ-45 standard ports - Alarm IN, Alarm IN/OUT, console and AUX-BITS/TOD.
