Full product description

Huawei OptiXstar K572 - High Speed Wi-Fi Connection 7

The **Huawei OptiXstar K572** is a state-of-the-art **Wi-Fi 7 router** designed to deliver fast, stable connections to any room. Mesh Wi-Fi 7 offers greater range and more stable connections that eliminate wireless dead zones. With high-speed **2.5G and 1G Ethernet ports**, the device will stand up to even the most demanding users, providing high-speed Internet access in any room. It is ideal for homes and offices that need a reliable wireless network with long range

Wi-Fi 7 - More speed, better coverage

The Huawei OptiXstar K572 supports **Wi-Fi 7** (Wi-Fi 7 - the next-generation wireless networking standard), which means **higher throughput** and **better coverage** than previous generations. With speeds of up to 2882 Mbps in the 5 GHz band and 688 Mbps in the 2.4 GHz band, the router provides reliable connectivity for multiple devices simultaneously. Thanks to **MIMO** (Multiple Input, Multiple Output) technology, **Wi-Fi 7** ensures a smooth connection, even under heavy use.

Mesh Wi-Fi - Networking without limits

With the help of **Mesh Wi-Fi** (Mesh Wi-Fi - technology for creating a wide-area wireless network in your home or office), the **Huawei OptiXstar K572** creates a consistent wireless network, eliminating dead zones in every corner of your home. With **Wi-Fi roaming** (802.11k/802.11v - a technology that allows you to switch between access points without losing connection), the device automatically switches devices between access points, ensuring uninterrupted connection quality. Mesh Wi-Fi 7 also adjusts network channels to maintain **maximum performance**.

Exceptional data transfer speed

The **Huawei OptiXstar K572** offers **2 2.5G Ethernet ports** and **2 1G Ethernet ports**, allowing you to connect bandwidth-hungry devices such as desktop PCs, 4K TVs and gaming consoles. **The 2.5G ports** offer data transfer speeds of **up to 2,500 Mbps**, making large file transfers and high-definition streaming smooth and seamless.

Easy setup and complete security

The **Huawei OptiXstar K572** offers features such as **Plug and Play** (a feature that allows the device to quickly start up without additional configuration) and **One-click pairing** (one-click to connect the device to the network), which allows the router to **quickly start up** and configure the network. With **WPS** (Wi-Fi Protected Setup - a secure way to configure Wi-Fi for easy and secure connection to other devices on the network), the device ensures **high security** of the connection. **Automatic synchronization** of Wi-Fi configuration allows you to seamlessly connect and optimize your network without the need to manually set the
