Full product description

A simple, affordable and functional webcam from Xiaomi

Imilab **FULL HD 1080P** is a simple and affordable but functional webcam from Xiaomi. The device provides excellent video quality with minimal delays and also records images in FULL HD at **30 frames per second**. All thanks to the high-quality 2-megapixel sensor.

Consistent and transparent video conferencing

IMILAB FULL HD 1080P webcam is ideal for everyday use. The device works perfectly with Skype / MS Teams / Zoom, offering great functionality, stylish design and high quality 1080P video. With built-in **plug and play** and direct USB power, all you have to do is plug it in and start using it. You can be sure that IMILAB camera will become your perfect companion for everyday video conferences and calls.

Stability is the key to success

The IMILAB camcorder records video in **1920 x 1080** resolution, providing clear and stable videos at 30 frames per second. Plus, with features like autofocus and light correction, you can customize the video to suit your needs. Recordings are brighter and clearer than conventional 720p webcams.
