Full product description

Infly PT02 sonic electric toothbrush

The inFly PT02 toothbrush is designed with new technology to thoroughly clean and whiten teeth, as well as protect gums. Thanks to vibration, the bristles thoroughly remove plaque even in the hardest-to-reach areas of the mouth.

Sound vibration power

The high-frequency generator produces sound waves that vibrate the bristles at **42,000 times per minute**. This means that an electric brush has more time to make more movements than a mechanical toothbrush, providing a more thorough cleaning. At the same time, the **Infly PT02** toothbrush cleans gently without damaging tooth enamel or gums.

Quiet operation of the device

Thanks to its special design, the toothbrush is **virtually silent**, not annoying the user in the early morning hours. The **Infly PT02** takes care of the smallest details to ensure comfort and excellent results.

4 modes of operation

Depending on the conditions, you can use one of four pre-programmed modes. **Standard mode** is designed for daily tooth brushing. **Gentle mode** - designed for sensitive gums and people using the toothbrush for the first time. There is a separate **whitening mode** for whitening front teeth and a 3-minute **mode for polishing teeth**. The last one is memorized for maximum convenience.

Unique Dupont bristles

DuPont 's soft, rounded bristles gently interact with enamel and gums to effectively remove plaque, providing a thorough and gentle cleaning.

Long battery life

Using the **Infly PT02** toothbrush twice a day for two minutes, the battery will last for 30 days. There is an LED indicator on the case that warns you when the battery is low. To charge the device, connect the **USB Type-C cable** to the toothbrush, and it will take just four hours to fully charge.

Waterproof IPX7

The **Infly PT20** toothbrush is waterproof according to the **IPX7** standard. A brief splash of water on the toothbrush will not affect its performance - you can clean your teeth in the shower and rinse the device after cleaning.
