Full product description

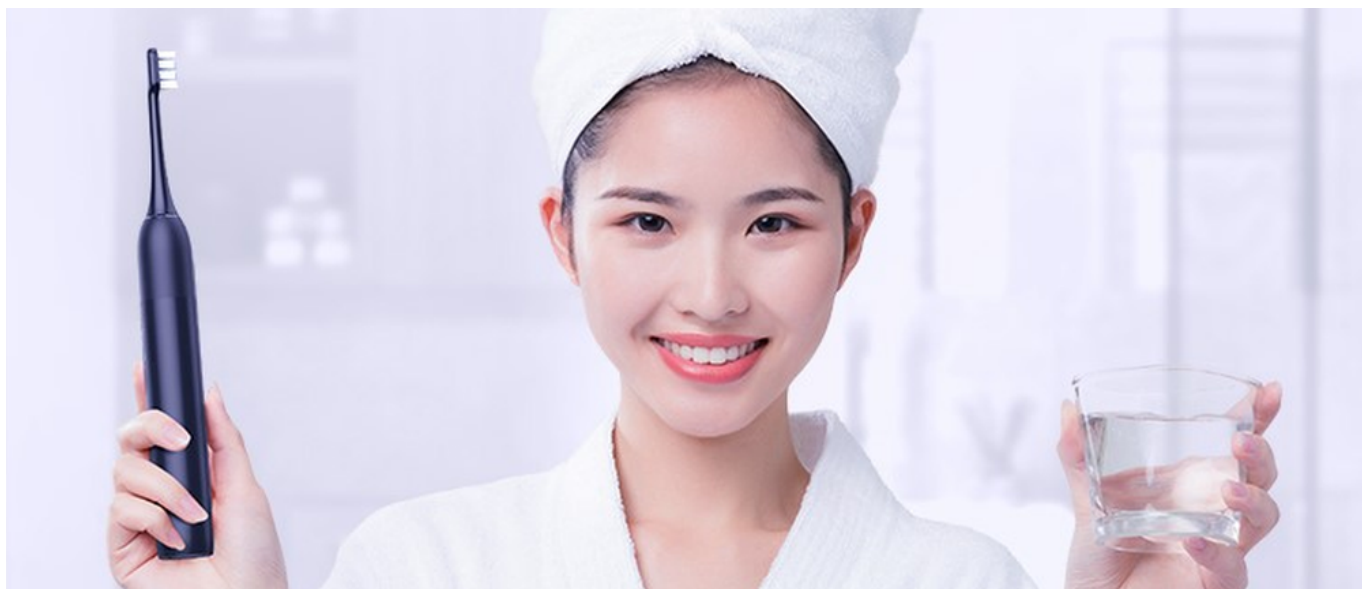

Infly T07X smart electric toothbrush

The **infly T07X** toothbrush activates when you touch your teeth and automatically turns off when you leave them, and the **infly T07X electric tooth** brush's dynamic algorithm learns based on your posture, habits, dwell time and pressure each time, and then automatically adjusts the intensity of your next brushing to provide a better cleaning result while taking care of your mouth.

Precision intelligence technology

The infly T07X electric tooth brush intelligently adjusts the force and frequency under different touch and pressure conditions, according to users' habits. When sensitive areas of the mouth are touched, the force and frequency are intelligently reduced to reduce stress on the gums. When brushing normal teeth, the force and frequency are increased to achieve a better cleaning effect.

Easy switching of brushing modes

Lightly touch the wake area, the brush head vibrates for 1.5 seconds, the corresponding mode **light** comes on. You can switch the mode or touch the teeth and automatically brush. **The device includes 4 cleaning modes and 4 intensity levels** that can be switched at will: cleaning, gentle, whitening, massage.

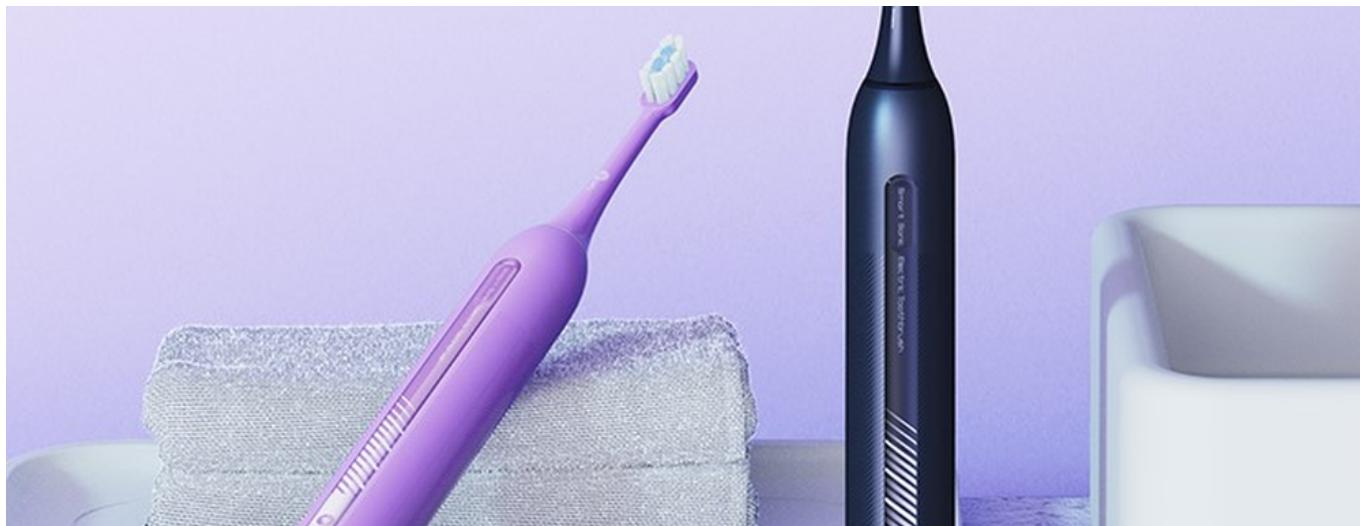

Introduction of advanced AI technology

R team

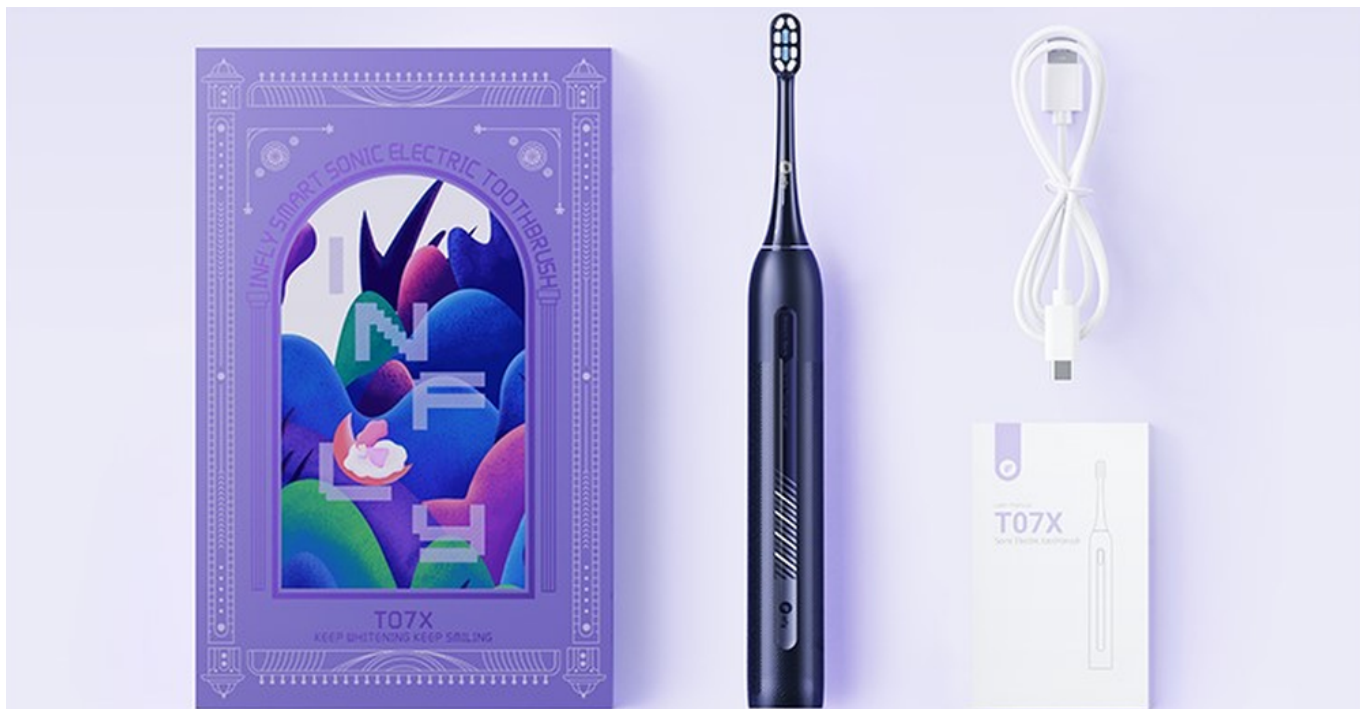

Automatic sleep mode

Automatically activates sleep mode to avoid forgetting to turn off the device and wasting energy while brushing. Effectively prevents accidental touching, so you don't have to worry while traveling.

180 days of operation on a single battery charge

Brushing your teeth 2 times a day for 2 minutes at a time, the battery lasts about 6 months on a full charge. The super-capacious battery provides a much longer life compared to other toothbrushes.

Waterproof IPX7

The entire body is waterproof according to the **IPX7 standard**, which gives you a full sense of security.

Better design, and the details are more attentive

The magnetic sonic motor in the **infly T07X** toothbrush vibrates at **36,000 rpm**, providing high power and deep cleaning. The bristles are **soft and slender**, do not hurt gums, and easily clean the gaps between teeth.
