Full product description

JIROUS JRE-28EX UPB 10GYZ 2PACK

Parabolic JRE-28 Extrem antenna working in 10 GHz band. It is characterized by 28 dBi gain, has been designed to work with **PowerBridge M10**, has high power ratio front / back. It is possible to change the polarization by 45° in the horizontal or vertical plane. **In the box comes to you 2 pieces** with screws to mount the PowerBridge M10. The device is equipped with a metal flange that provides adequate separation between the antennas on the mast, so there is less interference between the connections. The kit includes a plastic cover made of UV-resistant ABS.
