Full product description

JIRMA-650-10/11

The **JIRIOUS** antenna is designed for microwave links in the **10 and 11 GHz** frequency bands. Precise operation is compliant with **ETSI EN 302-217-4-2 class 2**. The whole antenna system with **JDMW-900** holder has extreme wind stability. The antenna is supplied with a bracket for easy mounting on a mast. The bracket can be mounted separately on a mast. Then you can simply hang the antenna with a microwave unit in it. We recommend mast mounting with a minimum of **Ø50 mm** in areas of adverse weather conditions. The bracket allows precise adjustment of the height (pitch) and azimuth $\pm 20^\circ$. Right and left side mounting is possible.

Distinguishing features JRMA-650-10/11

- professional microwave antenna
- metal parabola flange with absorbent material for high resistance to interference
- high insulation of adjacent connections
- solid bracket JDMW-900 with exact height and azimuth setting
- right and left hand assembly
- extreme wind stability
