Full product description

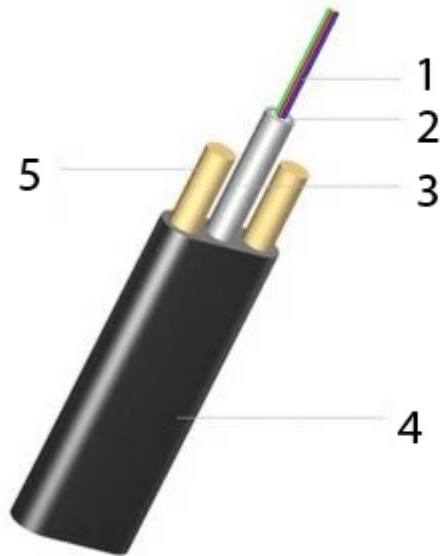

Overhead flat optic fibre cable 24F 1T24F, G652D

Extralink Flat Aerial Cable is a flat fiber optic cable designed for overhead installation. It uses **24** type G.652D fibers placed in a central loose tube filled with **hydrophobic gel**.

Overhead fibre optic cable resistant to harsh outdoor conditions

The reinforcement element is made up of two **FRP** rods. The cable has a cross-section of **10.6mm x 4.5mm** and a polyethylene outer sheath.

Extralink 24F fibre optic cable structure

- 1. optical fibres
- 2. hydrophobic gel filling the tube
- 3. central tube
- 4. polyethylene protective coat
- 5 Fibre reinforced plastic (FRP) rods

Features:

- fibre G.652D
- one central tube
- polyethylene outer shell
- 2 FRP reinforcing bars
- tensile strength 1.3kN
- cable cross section 10.6mm x 4.5mm

Application:

- overhead wires
- FTTx
