Full product description

Fiber optic overhead cable 2F S-NOTKSP

The **2F S-NOTKSP** overhead fiber optic cable is a fiber optic cable designed primarily **for overhead installations** for use in short runs. It is constructed using **2 G.657A1 fibers**, directly in the sheath. **Two FRP rods made of aramid yarn** are a reinforcing element built into the outer jacket to provide the required tensile strength of the cable.

The supporting element is a **steel rod**. The external **LSZH sheath** which protects the cable against external aggressions is UV resistant and **halogen free**.

Key features

- G.657A1 fibre
- Tensile strength 600 N
- Outer sheath LSZH
- Two FRP reinforcing bars
- Diameter ~ 5.2 mm (± 5%) * (2.0 mm * 3.0 mm (± 5%))
- Flat cable
