Full product description

8F overhead fibre optic cable, G652D, 5.2 mm

Extralink Aerial Cable is a fiber optic cable designed for use on short distances in overhead installations. **For its construction 8 G.652D fibers were used, which are placed in the central tube.** The reinforcement element, in addition to the circumferential strength elements, are **two FRP rods** made of aramid yarn **embedded in the outer sheath**, which provide the required tensile strength of the cable. The **HDPE** outer sheath on the core protects the cable from the external environment.

Key features

- Fibre G.652.D
- Tensile strength 1,2 kN
- HDPE outer coating
- Two FRP reinforcing bars
- Diameter 5.2 mm
