Full product description

Overhead fiber optic cable sm 24J by Fiberhome

Fiberhome unitube is a fiber optic cable designed for short runs in overhead installations. **It uses 24 fibers, sm G652D fiber type**, which are housed in a central tube. The reinforcing element, in addition to the circumferential strength elements, are two FRP rods of aramid yarn embedded in the outer sheath, which provide the required tensile strength of the cable. **The outer HDPE sheath on the core protects the cable from the external environment.**

Key features

- Fiber type - single mode sm G652D fibers
- Tension force 1.5 kN
- Outer sheath HDPE
- Two FRP reinforcing bars
- Diameter 5.2 mm
- Fiber count, 24
- universal cable
