Full product description

4F DAC Z-XOTKTCD Optical Fiber Cable

4F DAC Z-XOTKTCD fibre optic underground cable is a terrestrial fibre optic cable designed **for direct burial in the ground**. For its construction 4 **fibers of G.652D type** have been used, which are placed in the central tube. Strengthening element, in addition to perimeter strength elements, are **two FRP rods from aramid yarn** embedded in outer jacket, which provide required cable tensile strength. The **HDPE** outer sheath protects the cable from the external environment.

Compared to ordinary aramid cables, it has thicker FRP rods and a thicker outer sheath.

Key features

- Fibre G.652.D
- Tensile strength 1,2 kN
- 1.2 mm thick HDPE outer shell
- Two 0,8 mm diameter FRP reinforcing rods
- Diameter 5.3 mm
