Product colour	Black
Product weight	2580 g

Full product description

Protecting your floor and training comfort

The Kingsmith treadmill mat is the perfect solution for you to enjoy your workout without worrying about damaging your floor. Thanks to its protective properties, you can safely use the treadmill in any room while ensuring a quieter and more comfortable workout environment.

Unique design for your comfort

Made of TPE material, the mat effectively protects the floor surface from damage and scratches. Its non-slip properties provide stability, and its special design minimizes vibration, resulting in a quieter workout.

Silence and noise reduction

Thanks to the NBR material, the mat absorbs the noise generated by the treadmill, making training quieter and more comfortable. This is ideal for people who want to exercise at home without disturbing other household members.

Convenient storage

The mat is flexible and easy to roll up, making it convenient to stow away after your workout, saving space in your home.

Durability and performance

The NBR material from which the mat is made ensures its high resistance to wear. This is a product that will perform well for a long time, even under heavy use.
