Full product description

KINGSMITH MX16+ TREADMILL - Ideal solution for running at home!

KINGSMITH MX16+ Treadmill is a modern treadmill with a maximum speed of 16 km/h, which allows for versatile training in the comfort of your own home. Thanks to its foldable design, this treadmill is ideal for smaller rooms, and the unibody side handrail provides additional support during exercise.

Powerful motor and smooth speed adjustment

KINGSMITH MX16+ is equipped with an efficient, brushless 1.5 HP motor, which allows speeds of up to 16 km/h. Thanks to the **K5 Fit app** and the dial, you can easily control the intensity of your workout, adjusting the speed within a range of 1 to 16 km/h. This is an excellent solution for both beginners and advanced runners.

Wide running belt for comfort

The treadmill belt has a **width of 500 mm**, which guarantees comfort while running and minimises the risk of accidental tripping. **The belt length of 1320 mm** provides enough space for free movement, even at a faster pace. This means you can enjoy complete comfort regardless of the intensity of your workout.

Tri-Fold design - compactness and space saving

One of the biggest advantages of this treadmill is its **foldable design** in Tri-Fold style, which makes storage easy. When folded, it takes up very little space (only 246 x 773 x 1056 mm), making it ideal for people living in small flats. This means you can enjoy your workout without having to sacrifice a large amount of space in your home.

Revolutionary Vertical-Fold
