Full product description

Xiaomi Kingsmith Walking Pad A1 Pro

No more excuses that you don't have the time or space to play sports. The **WalkingPad A1 Pro** standing treadmill will provide CI with a great way to get more active and avoid the pain of sitting while working out. You can freely adjust the speed of the track using the remote control or thanks to the dedicated smartphone app. In addition, the manufacturer has developed an **automatic speed control mode** to make exercise even more comfortable. In this mode, the electric treadmill responds by pressure applied to one of the three sensitive zones on the belt treadmill.

Dual sport modes

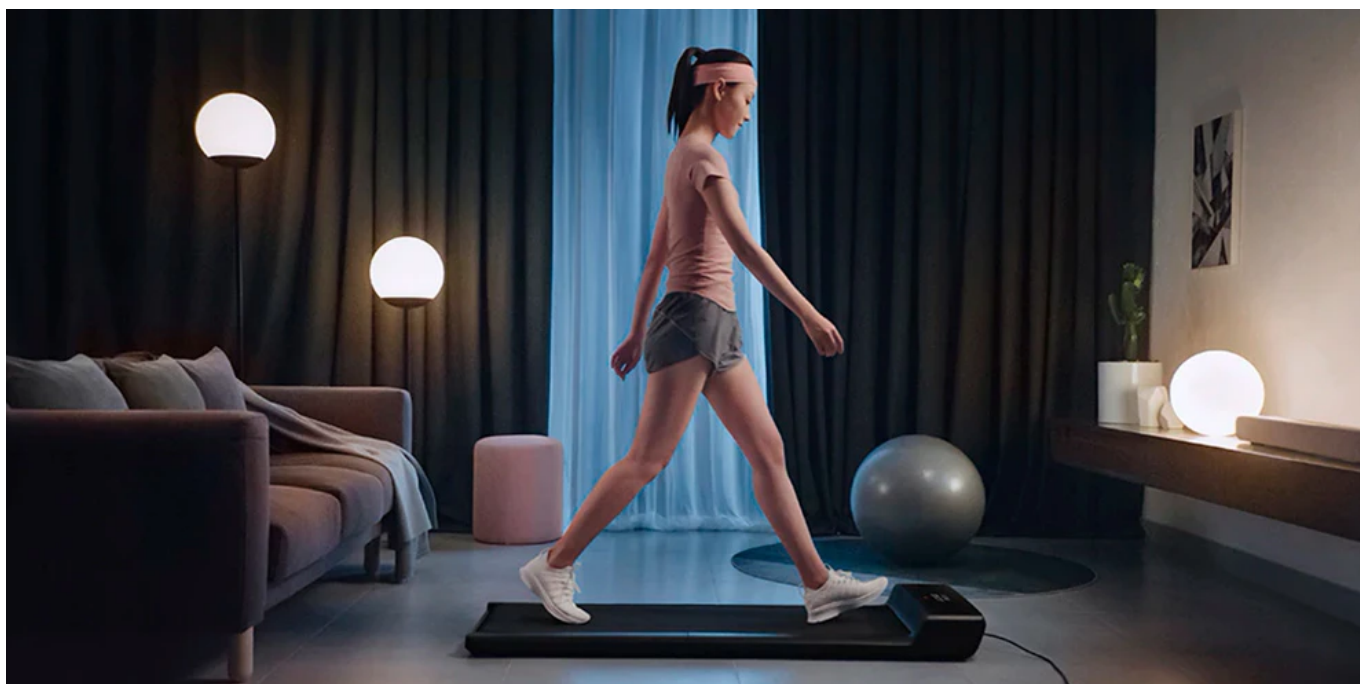

The **Kingsmith WalkingPad A1 Pro treadmill** comes with two sport modes. In "M" mode, users can manually control the treadmill with a dedicated remote control, switching modes as they see fit. All this ensures safety in case of a potential accident.

For beginners, it is recommended to use the "M" mode so that they get used to the device. In "A" mode, users do not need to control the treadmill and can run at an automatically regulated speed. This mode is suitable for experienced runners.

Full control

You can connect your smartphone to the treadmill via Wi-Fi network. The device has an **informative display** showing the current speed, number of steps, distance traveled and other parameters. You can find more detailed information in the app. Thanks to the foldable design, the electric treadmill takes up even less space and can take up almost any unused space in your apartment; under the bed, behind the door, in the closet or simply in the corner. **The Walkingpad A1 Pro treadmill is completely safe to use.**

Foldable design

The WalkingPad A1 Pro has a foldable design and a comfortable handle that you can lean on during your workout. You can adjust the position of the device according to your needs.
