Price: **3,499.01 zł** gross / 2,844.72 zł net

Manufacturer: KINGSMITH

Referention number: DNXXGKKPLRMMNP

Information:

Kingsmith WalkingPad X21 is a compact, intelligent electric treadmill that, when folded, takes up less than 0.16 m² and can be easily stored even in a wardrobe. It offers speed adjustment from 0.5 to 12 km/h, making it suitable for both walking and faster running. NFC connectivity and the KS Fit app enable convenient control, real-time viewing of training data, and saving of exercise history. The lightweight aluminium construction weighs 38 kg, while still supporting users of up to 110 kg. The four-layer running belt with an EVA layer absorbs shocks and reduces strain on the joints, and the brushless motor operates stably and quietly, not exceeding 75 dB.

Product features

Height	1020 mm
Width	420 mm
Depth	1420 mm
Bottle holder	No
Package weight	40500 g
Training displayed parameters	Calories
Material	ABS
Folded height	710 mm
Folded depth	226 mm
Folded width	955 mm
Control type	Rotary
AC input frequency	50 Hz
Maximum user weight	100 kg
Maximum speed	12 km/h
Minimum speed	0.5 km/h

Product colour	Grey
Running area (W x L)	460 mm
Foldable	Yes
Built-in display	Yes
Product weight	36000 g

Full product description

Takes up less than 0.16 m²

The **Kingsmith WalkingPad X21** smart electric **treadmill** is an impressive piece of exercise equipment that will help you improve your health and well-being. The treadmill has a sleek, lightweight design that allows for easy storage and transportation, it doesn't take up much space, and the unique double folding design allows you to store it even in a closet.

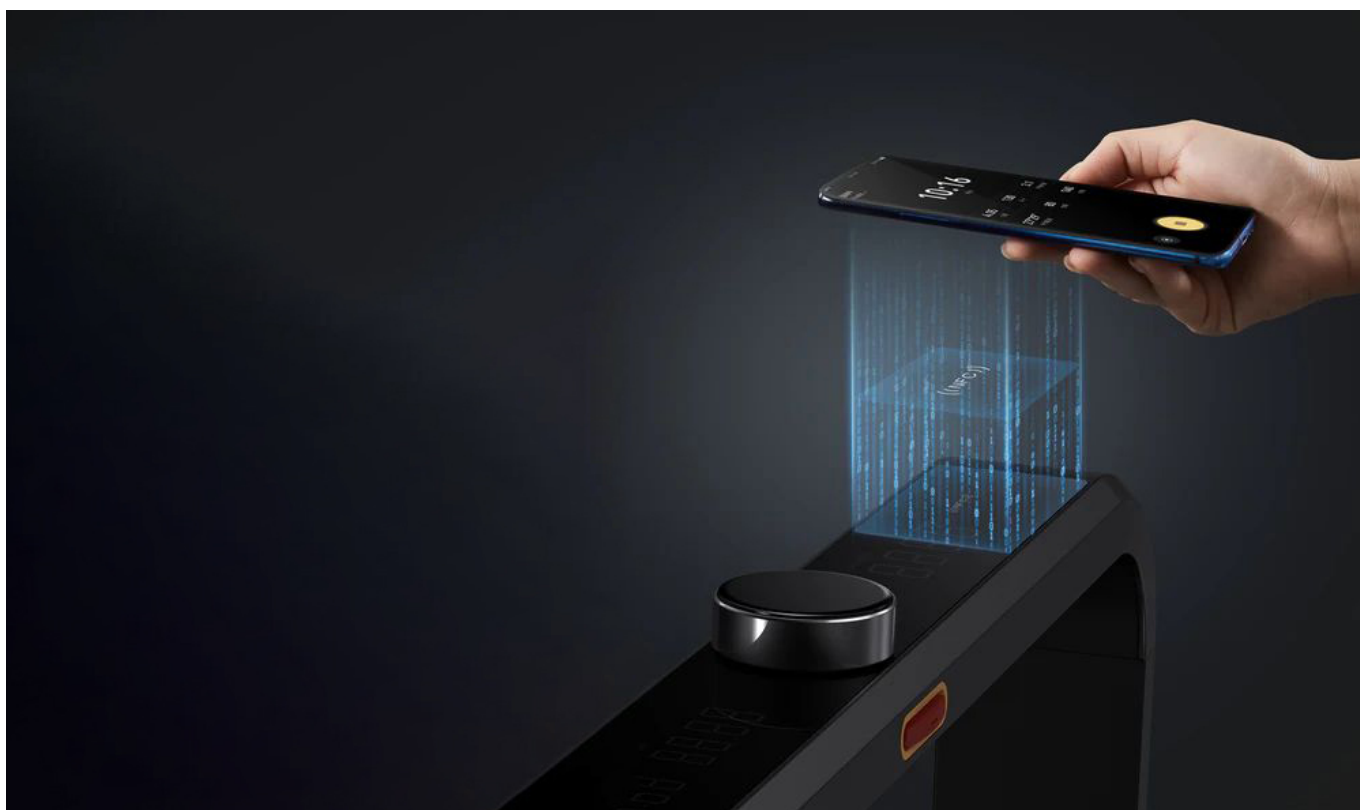

Adjustable speed

The **Kingsmith WalkingPad X21** offers different modes and speed levels (from 0.5 to 12 km/h), allowing users to adjust the intensity of their workout. This makes it suitable for training by users of different fitness levels.

Convenient interaction

With **NFC support**, the treadmill easily connects to your smartphone and gives you the ability to control your workout settings in a way that suits you. Using the app, you can gain full access to the KingSmith interface on your smartphone and watch your workout data change in real time.

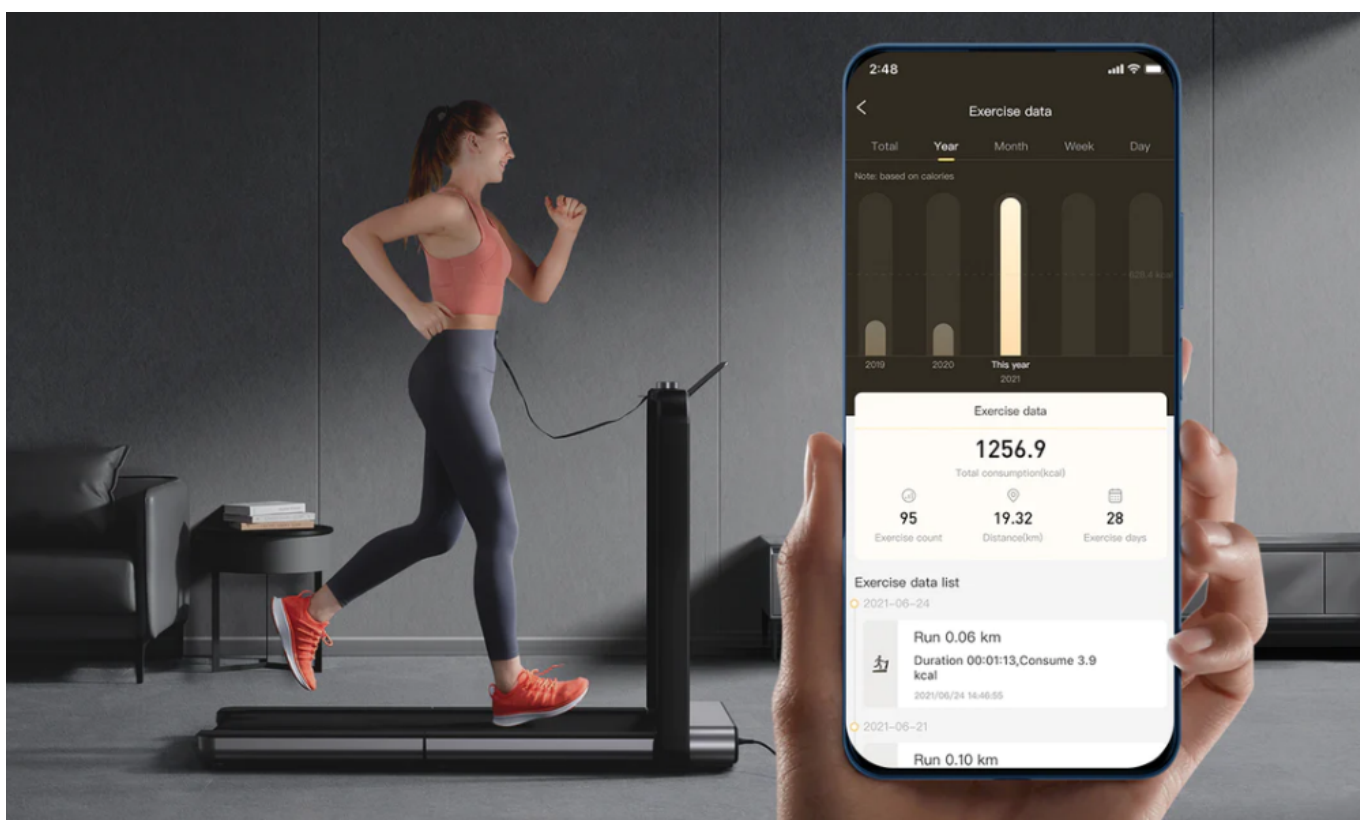

Aesthetic appearance

The built-in **digital LED display** is visible only during training, at rest you can only see the completely smooth panel. In active mode, the display provides up-to-date training data and allows you to easily change running parameters.

KS Fit app

The **KS Fit app** can store and track your workout data, while controlling the X21's modes: switching between modes, starting, stopping, accelerating, decelerating, etc.

Lightweight and durable design

The classic black color and austere lines make such a treadmill not only useful, but also a stylish attribute of your home. The construction of the **KingSmith WalkingPad X21** is made of lightweight and super strong aluminum alloy, so the machine weighs only 38 kg, even though people weighing up to 110 kg can use it.

Four-layer construction

The KingSmith X21 4-layer running surface provides the safest and most comfortable running experience. Under the outer layer of the running belt, there is a special soft and flexible EVA layer that effectively dampens running vibrations and helps reduce stress on joints and ligaments. The top relief layer has an anti-slip coating and provides a firm grip between the sole of the shoe and the pavement.

Brushless motor

With its high-performance brushless motor, it provides stable power output. Even at maximum speed, the noise of the **Kingsmith X21** does not exceed 75 dB and allows you to exercise even late at night.
