Price: **459.00 zł** gross / 373.17 zł net

Referention number: DNXXGGJNKKRMMKL

Product features

Power source	Batteries
Height	132 mm
Response time	1 ms
Buttons type	Pressed buttons
Sensor	HERO 25K
Width	75 mm
Depth	40 mm
Battery life (max)	60 h
Buttons quantity	11
Feet durability	250 km
Battery capacity	240 mAh
Battery capacity	0.9 Wh
Package weight	436.1 g
Illumination colour	Multi
Number of scroll wheels	1
Harmonized System (HS) code	84716070
Cable length	1.8 m
Master (outer) case height	188 mm
Mouse tracking speed	400 ips
Master (outer) case width	147 mm
Technology	LIGHTSPEED
Illumination	Yes
Number of programmable buttons	11
Package depth	115 mm

Package height	172 mm
Master (outer) case gross weight	1928.4 g
Package width	68 mm
Receiver included	Yes
Programmable mouse buttons	Yes
User guide	Yes
Master (outer) case length	244 mm
Acceleration (max)	40 G
Built-in memory	Yes
Mac operating systems supported	macOS
Windows operating systems supported	Yes
Polling rate	1000 Hz
Battery technology	Lithium Polymer (LiPo)
Number of batteries supported	1
Adjustable weight	Yes
Rubber grips	Yes
Button functions	Back
Product colour	Black
Device interface	Wireless RF
Scroll type	Wheel
Other operating systems supported	ChromeOS
Cable features	Braided
Customizable movement resolution	Yes
Movement resolution	25600 DPI
Feet material	Polytetrafluoroethylene (PTFE)
Surface colour	Image
Designation	Gaming
Baby unit batteries included	Yes
Product weight	114 g

Full product description

Logitech G502 Lightspeed

G502 is a legendary mouse that has won the love of professional gamers and popularity among users of all generations. **G502 Lightspeed** has become one of the most advanced wireless mice in the world. It also features a **Hero 25K** sensor and supports Powerplay technology. **The G502 Light** speed still retains the user-favorite design and is 7 grams lighter.

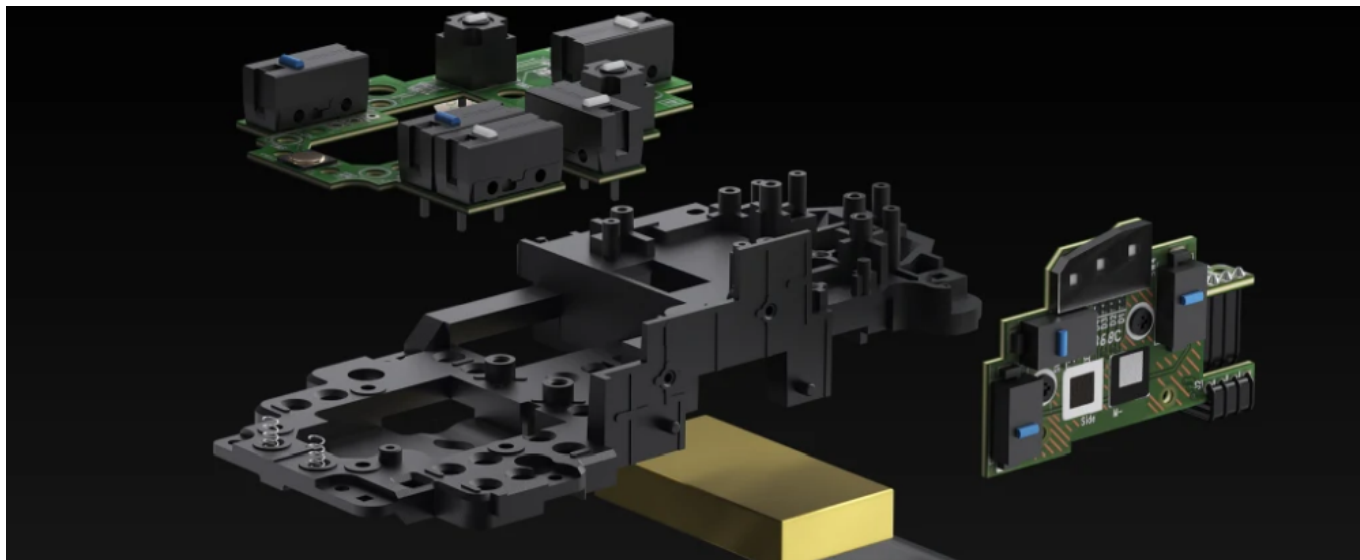

A new look at the legendary mouse

The **G502 Lightspeed** is the most advanced gaming mouse ever created. This model retains the name and feature set of the original version, but has been completely redesigned with the latest innovations. Thin-walled construction and an innovative roll cage design reduce the weight of the mouse by 7 grams. This mouse also supports industry-leading wireless technologies **Lightspeed**, **Hero 25K** and **PowerPlay**.

Frame design

As a rule, the durability of mice is ensured by the robustness of the housing. However, mice made under this approach are heavyweights. **The G502** is a completely different design. Its strength comes from its lightweight internal frame, which has been slimmed down to just **1.2 mm**, making it lighter overall.

Spring-loaded buttons

Main buttons with a metal spring mechanism provide high speed operation. Each of their presses will be transmitted clearly and reliably.

Weight adjustment system

Six adjustable weights allow you to find the perfect weight and balance. Precise weight adjustment ensures optimal tracking and positioning.

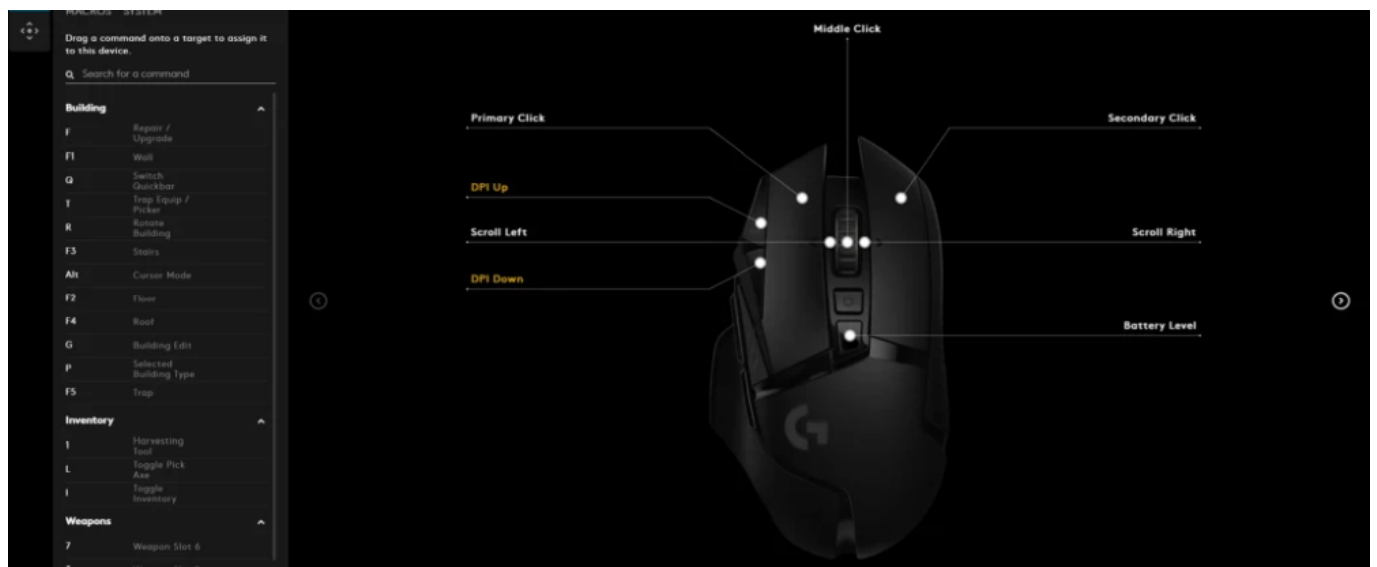

Super fast scroll wheel

The redesigned scroll wheel allows free, fast and smooth scrolling. In addition, the scroll wheel can be locked, activating the standard step-by-step scroll mode. Switching between the two modes is quick and easy.

11 programmable buttons

Logitech G HUB software allows you to assign functions, macros and other commands to the buttons, customized for each game or program. Building, fighting, ducking, dodging bullets and healing wounds - now you can do it all with the swipe of a finger.

Lithium-polymer battery

A full charge of the lithium-polymer battery provides **60 hours of uninterrupted gameplay**. A quick charge in 5 minutes using a standard USB 2.0 or later cable provides 2.5 hours of gaming time. A separate mains-powered charger is not required.

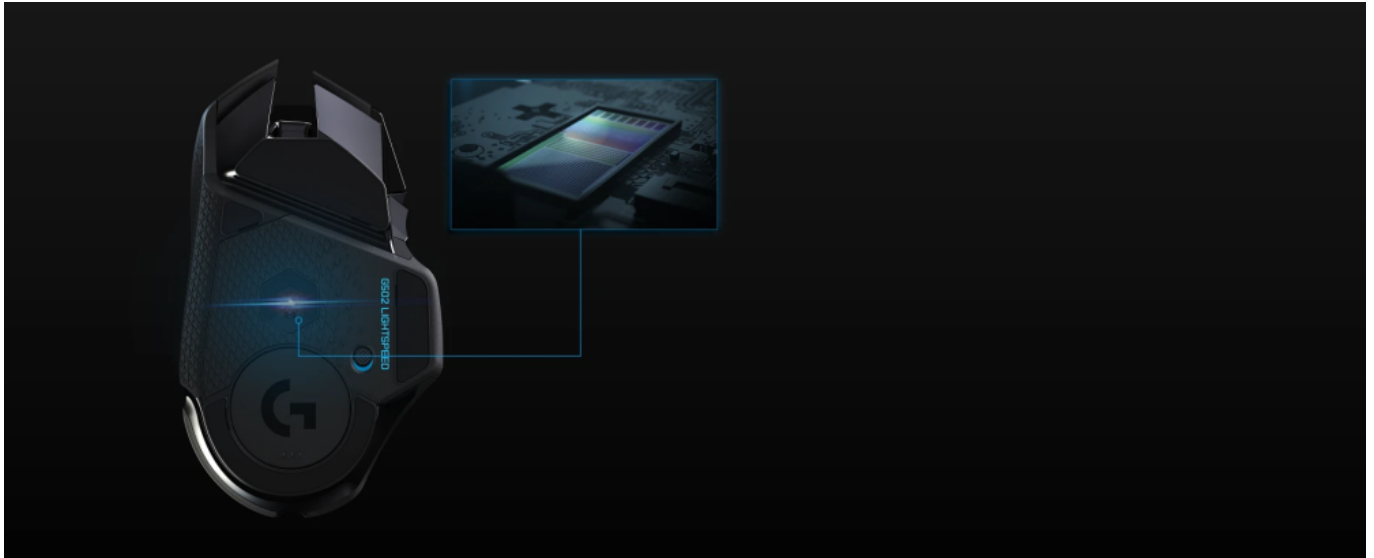

Rubber side washers

Double injection molded rubber side pads provide a firm grip and full control of the mouse.

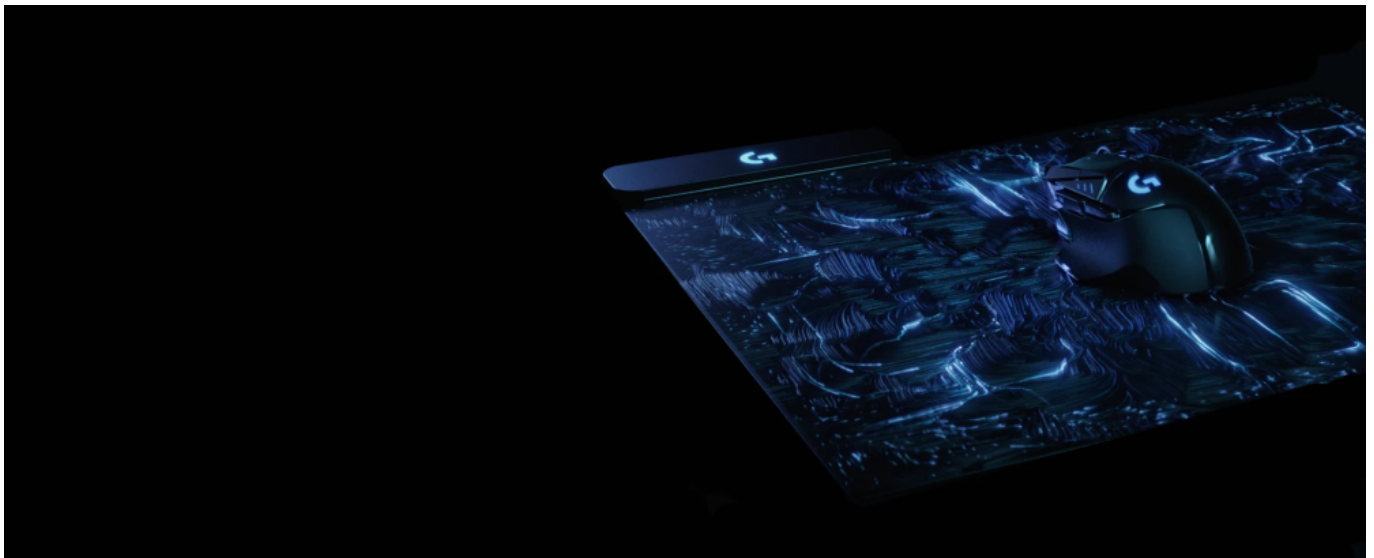

Hero 25K sensor

The next-generation **Hero 25K** gaming sensor delivers tracking speeds of more than **10m/s (400in/s)** at all sensitivity levels(**up to 25600dpi**) and has 10 times lower power consumption than previous models. It's also the most accurate and fastest-performing gaming sensor to date. This makes the mouse lighter and the battery extremely compact.

PowerPlay

With the fast **Lightspeed** mouse, you can play without limits. **PowerPlay** wireless charging technology allows you to charge **the G502** when it's not in use, as well as while you play. You no longer have to worry about battery life. It just won't run out.

RGB Lightsync lighting

RGB backlight technology allows you to synchronize the backlighting of various **Logitech G-enabled** devices. Simply select the desired color from a palette of about **16.8 million shades** to match your room and equipment. Users can also create their own RGB backlight animations. The choice is yours. The free **Logitech G HUB** software provides full control over RGB lighting and many other features.
