Full product description

Wi-Fi coverage in every nook and cranny of the house

The **Mercusys Halo H70X 3-pack** is a state-of-the-art dual-band Mesh **Wi-Fi 6** system with up to **1800 Mbps**, designed to provide reliable **Wi-Fi** coverage over an area of up to **550 m²**. With this innovative solution, you can enjoy a fast and stable Internet connection in every nook and cranny of your home - on the terrace, balcony, garage and garden.

Stability of connection without compromise

The **Halo H70X** system switches users between devices (routers) exceptionally efficiently, ensuring a stable and continuous connection to the network, even while moving around the house. Forget about dead zones and speed loss - with Halo **H70X**, the Internet is always at your fingertips.

Amazing speed and compatibility

The **Halo H70X** guarantees fast and stable connections at speeds of up to **1800 Mbps (574 Mbps in the 2.4 GHz band and 1201 Mbps in the 5 GHz band)**. The system works with all major ISPs and modem providers, providing flexibility and convenience. Each access point has three Gigabit Ethernet ports (**10/100/1000 Mbps**), allowing you to take full advantage of the potential of your Internet connection.

Advanced technologies for better performance

The **Mercusys Halo H70X** uses six advanced signal amplifiers and receivers to increase transmission power and speed up the reception of signals from connected devices. With **OFDMA and MU-MIMO** technology, you can connect up to 150 devices simultaneously, enjoying a smooth and reliable Internet connection.

Smart and convenient solutions

With automatic WAN/LAN detection, **the Halo H70X** eliminates the need to separate two separate ports, further enhancing the user experience. The Smart Connect function combines the **2.4 GHz and 5 GHz** bands under a common **SSID** name, allowing devices to intelligently connect to the best available **Wi-Fi band**.

Increased range and reliability

The **Halo H70X** system not only extends **Wi-Fi** coverage, but also provides greater reliability with an auto-repair function. In the event of an error on one of the units, the system will automatically reroute data to another device to prevent **network** interruption .
