Full product description

MikroTik CA411/711 enclosure

Aluminum enclosure designed for indoor use for **RBM11G, RB411, RB911, RB912 and RB922** series. Removable panels with port openings allow for maximum efficiency and ease of installation. Even if you need to reduce or increase the number of ports, you can always add a new panel to meet your requirements.

The aluminum alloy **housing** is lightweight and durable, so it can easily handle tasks such as mounting to walls, ceilings and other indoor solutions. The **CA411/711** also has a stylish but unobtrusive design.

Key features

- Interchangeable panels for different configurations
- 3 holes for Wi-Fi pigtails and antennas
