Price: **343.26 zł** gross / 279.07 zł net

Manufacturer: MIKROTIK

Referention number: DNXGGIJLMRMMJN

Information:

MIKROTIK cAP XL ac is a discreet ceiling-mounted Wi-Fi access point, ideal for offices, hotels and busy spaces where aesthetics and limiting physical access to the device matter. Its low profile makes it almost invisible, while the dual-band, dual-chain 2,4 and 5 GHz radio provides stable 360° coverage around the device. The new design, with a larger high-gain antenna, higher sensitivity and a built-in reflector, increases coverage by up to 100% compared with previous cAP models, improving signal quality throughout the premises.

Product features

Height	42 mm
Antenna type	Internal
Width	191 mm
Security features	IPsec hardware acceleration
Mean time between failures (MTBF)	100000 h
Chipset	IPQ-4018
Input current	1.2 A
Security update term	IPsec hardware acceleration
Compliance certificates	CE
Maximum data transfer rate	867 Mb/s
Power consumption (max)	24 W
Power consumption (typical)	11 W
Networking standards	IEEE 802.3af
Ethernet LAN (RJ-45) ports	2
DC voltage range	24 V
Flash memory	128 MB

DC-in jack	Yes
Wi-Fi data rate (max)	867 Mbit/s
Cabling technology	10/100/1000Base-T(X)
Wireless technology	Wi-Fi 5
Frequency band	2 GHz
Processor frequency	716 MHz
WPS push button	Yes
Operating system installed	RouterOS
Power over Ethernet (PoE)	Yes
Internal memory	16 MB
Placement	Ceiling
Bluetooth	No
AC input voltage	17 V
Processor model	IPQ4018
Built-in processor	Yes
Power over Ethernet (PoE) type supported	Passive PoE
Product colour	White
Maximum data transfer rate (5 GHz)	867 Mb/s
Maximum data transfer rate (2.4 GHz)	300
6 GHz	No
5 GHz	Yes
2.4 GHz	Yes

Full product description

MIKROTIK CAP XL AC: Ceiling-mounted Access Point

Do you need a nice looking access point that won't get in your way? Or maybe you are managing a network in a crowded place and don't want everyone to have physical access to the device? **MIKROTIK CAP XL AC** is the solution. The device itself is very sleek - its low profile attracts less attention than a smoke detector. Your clients, guests, or co-workers won't even notice it. But they will definitely notice the **fast wireless connection** in the whole facility.

What's New?

The new design features a larger **high-gain** antenna , **higher sensitivity**, and a **built-in reflector**. These improvements increase the coverage area by up to 100% compared to previous cAP models!

The dual-band, dual-chain **2.4** and **5 GHz** wireless radio provides strong **360-degree** coverage around the unit, so you no longer have to worry about placement. Placing it on the ceiling **eliminates** many signal absorption issues such as signal blocking by large TVs, metal walls in open space offices, etc.
