Full product description

Discover unparalleled networking capabilities with the Mikrotik CRS320-8P-8B-4S RM.

This advanced switch features 16 PoE-enabled RJ45 ports and 4 SFP slots for ultra-fast data transfer. Ideal for small and medium-sized businesses, it provides the reliability, performance and versatility needed to manage modern networks. With RouterOS v7, network management becomes simple and intuitive.

PoE versatility and performance

The Mikrotik CRS320-8P-8B-4S RM is equipped with 17 Ethernet ports, which enables **simultaneous powering of multiple network devices**. Ether 1 - Ether 8 ports support PoE af/at standards, while Ether 9 - Ether 16 ports support PoE bt for maximum flexibility. This allows you to easily manage and power your devices such as IP cameras, VoIP phones and wireless access points.

Advanced Switch Layer 3 Features

Mikrotik CRS320-8P-8B-4S RM is not only a switch, but also a Layer 3 switch, which allows **advanced network traffic management**. With RouterOS v7 and Level 5 license, users have access to advanced routing, QoS and network monitoring features. It's an ideal solution for businesses that need advanced network features at an affordable price.

High throughput and reliability

The switch features 4 SFP (10 Gbps) slots for ultra-fast network connections. With an ARM 32bit architecture, a dual-core processor clocked at 800 MHz and 256 MB of RAM, the CRS320-8P-8B-4S RM **offers unmatched performance and reliability**. It is ideal for environments that require high bandwidth and stable connectivity.
