Full product description

GPEN21 PoE MikroTik Injector

The GPEN21 PoE MikroTik PoE Injector is an intelligent PoE injector with **two Gigabit Ethernet ports** and an SFP slot. The device performs its function as a functionally complex repeater. **GPEN21 is a series of GPEN (Gigabit Passive Ethernet Network) devices** characterized by an easy to implement solution in the Ethernet network structure. The GPEN21 PoE Injector mikroTik has mechanisms such as **PoE power supply to the uplink device, VLAN, SNMP or Basic Traffic Shaping support**, network interface monitoring and management. It allows to power the CPE device, which is located on the roof in a wireless way and to use the equipment as an external power supply for the switch and also as a subscriber box.

GPEN21 PoE MikroTik Injector - Basic parameters

- Two Ethernet (Gigabit) 10/100/1000 Mbps ports.
- One SFP port.
- PoE output.
- Operating temperature of the device: From -20 to 70 degrees C.
- The kit has no power supply.
- The GPEN21 PoE Injector is equipped with a housing for wall mounting.
