Full product description

External enclosure - MIKROTIK GPER-IP67-CASE

Rugged outer casing for **GPeR** units. It can be easily mounted on walls and poles. Despite the name, meticulous tests have shown that in reality the casing has a protection level **IP68** with protection against immersion in water as well as against dust. To safely extend the Ethernet network in mines, caves, maintenance shafts or outdoors, you must purchase a GPeR casing outdoors.
