Full product description

MikroTik InterCell base stations give you the ability to quickly expand your existing **LTE** solution and even launch a new LTE mobile operator without typical costs, infrastructure and size requirements.

MikroTik

The InterCell series of external devices includes several models, choose the best option depending on the required frequency band configuration. The devices support up to **10W** output power for **city-wide coverage**.

The new InterCell series from MikroTik are small LTE base stations that support up to **192 LTE client devices** each. It is an excellent, low-cost solution for Internet service providers, mobile operators and others who need to provide LTE connectivity to the Internet. InterCell devices are equipped with a special **Mikrotik InterCellIOS** operating system.

Features MicroTik InterCell 10 :

1. Telecommunication voltage -48V
2. Dual **ports SFP**
3. Two **Gigabit Ethernet ports**
4. Built-in lightning conductor
5. Supports **EPC**, working completely independently (does not require a central network core) with up to 32 clients
