Full product description

MikroTik RouterBoard L11UG-5HaxD - New Era of Wireless Networks.

MikroTik RouterBoard L11UG-5HaxD is an advanced networking platform equipped with a **2x2 MIMO** radio module , operating in **802.11ax** and the **5 GHz** band. With two **MMCX** slots, users can connect external antennas, making this device an extremely versatile and flexible networking solution.

Powerful DIY Opportunities with MikroTik

The L11UG-5HaxD offers the latest **Wi-Fi 6** technologies, allowing you to build low-cost indoor or outdoor **CPE client sets** and point-to-point (PtP) wireless connections. With a powerful **Wi-Fi 6** radio and **MMCX** connectors, you can add an **RP-SMA/m** antenna (**HGO-antenna-OUT**) or try the **mANT30 PA** antenna (MTAD-5G-30D3-PA) for powerful long-range links .

Modern Technology in a Compact Form

The **L11UG-5HaxD** is equipped with a state-of-the-art **Qualcomm** Maple processor based on **ARM** architecture, clocked at **800 MHz**, and **256 MB of RAM**. Additional features include a USB port for additional storage or other needs, an **802.11ax** radio module and a **Gigabit Ethernet** port **with PoE-in** . The device comes with a **RouterOS Level 4** license , which guarantees advanced configuration capabilities.
