Price: **341.74 zł** gross / 277.84 zł net

Manufacturer: MIKROTIK

Referention number: DNXGGMPSIRMNJ

Information:

MikroTik L23UGSR-5HaxD2HaxD is a modern Wi-Fi 6 router with dual-band and dual-chain in the 802.11ax standard, delivering high performance in the 2.4 GHz and 5 GHz bands. Equipped with a Qualcomm Maple processor and 256 MB RAM, it is well suited to demanding home and business applications. It offers a Gigabit Ethernet port with PoE-in, a 2.5G SFP slot for fibre connectivity, and passive PoE power supply, making installation easier. With RouterOS Level 4, you gain advanced management, security, stability, energy efficiency, and roaming features.

Product features

Product type	Motherboard
Power consumption (max)	25 W
Networking standards	IEEE 802.11a
Storage capacity	256 MB
DC input voltage	12 V
Processor frequency	800 MHz
Power over Ethernet (PoE) ports quantity	1
Internal memory	128 MB
Wi-Fi band	Dual-band (2.4 GHz / 5 GHz)
Power over Ethernet (PoE) voltage range	18 V
Top Wi-Fi standard	Wi-Fi 6 (802.11ax)
Processor cores	1
Device compatibility	Router
Basic switching RJ-45 Ethernet ports type	Gigabit Ethernet (10/100/1000)
Basic switching RJ-45 Ethernet ports quantity	1

Full product description

Modern Wi-Fi 6 Router: MikroTik L23UGSR-5HaxD2HaxD

We present **the MikroTik L23UGSR-5HaxD2HaxD**, the latest solution in the **Wi-Fi 6** router category, which will revolutionise your networking experience. This advanced model from the **RouterBoard** series is equipped with a **dual-band, dual-chain radio** operating in the **802.11ax** standard, guaranteeing unrivalled performance in the **2.4 GHz and 5 GHz** bands. Designed for both home and commercial use, this router is the ideal choice for those seeking reliability and **high data transfer speeds**.

High performance and advanced technologies

Thanks to the modern **Qualcomm Maple** processor and **256 MB of RAM**, the router **supports the most demanding applications and devices**. The **Gigabit Ethernet port with PoE-in** and an additional **2.5G SFP slot** for fibre connectivity provide flexibility in network design and are ideal for environments requiring **fast data transmission**. The device also offers passive **PoE** power, which makes installation easier in places where traditional power sources may be unavailable.

Advanced networking features with RouterOS

The router comes with a **RouterOS Level 4** licence, which opens the door to advanced network management, security and configuration for users. Features such as improved stability, security, power management and roaming are just some of the benefits you will gain by choosing this model.
