Full product description

Access point

The new LtAP is a compact, weather-resistant wireless access point - ideal for use in congested urban environments or external computer networks. It has a 2.4 GHz 802.11b/g/n high power wireless port and a Gigabit Ethernet LAN port for wired devices. There are several power options - DC jack, POE-in and car jack.

Multiple expansion options

The device is equipped with two miniPCIe sockets, which offer many expansion options. For example, you can install the selected LTE backup modem and 5GHz interface to have two 2.4GHz / 5GHz parallel AP + LTE. LtAP has an RS232 serial port that gives access to the console for debugging, as well as full USB size for other devices.

Robust and ready for any challenge

The rugged housing with a special wall-mounting kit will be the ideal solution for almost any challenge: from public transport, food trucks or logistics to harsh winter and hot weather. LtAP can operate in temperatures from -40° C to +70° C. It is the ideal solution for controlling vehicles in real time. LtAP has up to 3 Mini-SIM slots for easy roaming management. It saves your time and money all over the world!

Key features

- 3x mini SIM sockets
- Gigabit Ethernet port
- Built-in GPS (no antenna included)
- Multiple power options (DC socket, POE-in, automotive connector)
- Serial and USB port
- AP 2.4 GHz in a rugged housing
- 2x miniPCle socket
- Ideal for mobile applications
