Full product description

MicroTik NetBox 5

MikroTik RouterBoard NetBox 5 (RB911G-5HPacD-NB) is a two-chain client device for outdoor applications, equipped with **RP-SMA** connectors for antennas and cable shielding for protection against humidity. This device supports the new **802.11ac** standard for increased wireless transmission speed (**866Mbit data rate and 20/40/80MHz channels**). NetBox 5 works as **AP / CPE / Point-to-Point** to fully utilize the potential of wireless **2x2 MIMO 802.11ac** networks. The processor that was used in NetBox 5 is **CPU QCA9557 720MHz with 128MB RAM**.

The casing can be opened with one hand and is protected from the weather. The Ethernet and ground outputs are located at the bottom, behind the cover.

Compatible with older devices

The kit includes a mounting ring for pole/mast mounting and a separate DIN rail mounting. The package also includes **PoE** injector and 24 V, 0.8 A power supply... The new products are backwards compatible - for example, you can replace the older **Access Point 5GHz 802.11a/n** with a new **802.11ac** and existing customers will still be able to connect to it.

The most important features:

- MIMO 2x2
- Two RP-SMA antenna connectors
- Standard 802.11ac
- Operation in the 5 GHz band (4920 - 6100 MHz)
- Transmission power up to 31 dBm
- Throughput up to 866 Mb/s
- Gigabit Ethernet port
- Power supply: passive PoE 8-30VDC
- Compatible with older equipment
