Full product description

Powerful device with PoE support

Routerboard powerbox rb750ppbr2 is an external router with **five Ethernet** ports with **PoE output on four ports**. This device can power four PoE-compatible devices, such as our SXT or others.

The structure is resistant to the conditions

Since the Mikrotik routerboard powerbox rb750ppbr2 has a **waterproof external enclosure**, it can be mounted on a tower or in other outdoor locations. The device has **five shielded Ethernet** ports, four of which can power other PoE-enabled devices with the same voltage as the device (maximum output current is **1A per port**, maximum total output is **2A**). Less problems with power supply and cables!

The most important features:

- Waterproof casing
- PoE input
- PoE output
- Pole mountable
- Monitoring of PCB voltage and temperature
- 5x Lan ports
- Two types of power supply (Power supply, Passive PoE)
- Well-chosen components (650mhz cpu 64mb frames)
